**Representative Nicholas X. Duran's HB 91 Passes in
Commerce Committee**

TALLAHASSEE, Fla. – Earlier today, [HB 91](#) passed with unanimous bipartisan support in the Commerce Committee. **HB 91** provides DHSMV authority relating to the display and use of digital license plates and specifies requirements for digital license plates, digital license plate providers, and digital license plate consumers.

“Bringing digital license plates to Florida helps to pave the way into a more connected future. Florida has always been on the cutting-edge of technology and allowing the use of this technology can bring large-scale efficiency and savings to the over 17 million registered vehicles in our state. I am happy this bill was able to make it out of committee and is on its way to becoming law,” said **Representative Duran (D-Miami)**.

Having passed favorably, the bill has been added to the Second Reading Calendar.
