Pupil Population Changes Throughout the 2006-07 School Year

1. Tables 1., 2. and 3. and Chart 1-- Population Changes for Approximately Every 20 Days in 2006-07

Four views are provided to show the changes across the 2006-07 School Year. The first table shows raw totals of pupil populations across each of the specific dates while the second shows the percentage change from the prior month. The final column in the second table shows the change from the count of September 15, 2006. The third table provides the net percentage change from the first count date (9/15/06) to the last count date sorted by percentage change.

Notable in these tables are the changes that show that 10 districts gained population from the first count (9/15/06) to the last count while 57 districts lost population over that span of time.

Chart 1 provides a graphic presentation of the changes referenced in Table 3.

2. Charts 2-5 -- Net Change in Selected Grade Membership

Charts 2-5 provide a graphic representation of the change in membership counts across the 9 count dates for each of the grades 3, 6, 9, and 12. Notable points are the changes from the first to the last point in grades 9 and 12.
