

HOUSE OF REPRESENTATIVES STAFF ANALYSIS

BILL #: CS/CS/HB 153 Healthy Food Financing Initiative

SPONSOR(S): Agriculture & Natural Resources Appropriations Subcommittee; Agriculture & Natural Resources Subcommittee; Santiago and others

TIED BILLS: **IDEN./SIM. BILLS:** CS/SB 760

REFERENCE	ACTION	ANALYST	STAFF DIRECTOR or BUDGET/POLICY CHIEF
1) Agriculture & Natural Resources Subcommittee	12 Y, 0 N, As CS	Gregory	Harrington
2) Agriculture & Natural Resources Appropriations Subcommittee	13 Y, 0 N, As CS	Lolley	Massengale
3) State Affairs Committee		Gregory	Camechis

SUMMARY ANALYSIS

Food deserts are urban neighborhoods and rural towns without ready access to fresh, healthy, and affordable food. Instead of supermarkets and grocery stores, these communities may have no food access or are served only by fast food restaurants and convenience stores that offer few healthy, affordable food options. Healthy Food Financing Initiatives are programs designed to make funding available in the form of loans, grants, promotions, and other programs to create healthy food options in food deserts.

The bill directs the Department of Agriculture and Consumer Services (DACS) to create a Healthy Food Financing Initiative Pilot Program. Specifically the bill:

- Authorizes DACS to contract with one or more qualified nonprofit organizations or Florida-based federally certified community development financial institutions to administer the program and creates eligibility criteria for such organizations.
- Requires DACS to establish program and eligibility guidelines.
- Requires DACS or a third-party administrator to establish program guidelines, raise matching funds, promote the program statewide, evaluate applicants, disburse grants and loans, and monitor compliance and impact.
- Directs projects under the program to be located in underserved communities; primarily serve low to moderate income families; and provide for the construction, renovation, or expansion of independent grocery stores or supermarkets and community facilities.
- Requires DACS to submit a report by March 1, 2021, to the President of the Senate and the Speaker of the House of Representatives on the projects funded, geographic distribution of projects, program costs, and program outcomes.
- Enumerates program application requirements.
- Directs DACS or the third-party administrator to give preference to local, Florida-based grocers and business owners; consider the level of need in the area served; and consider the project's positive economic impact when determining which projects to finance.
- Specifies how program financing may be utilized.
- Requires DACS to transfer funds received from loan repayments to the General Revenue Fund.
- Requires DACS to adopt rules to implement the program.
- Provides an expiration date for the pilot program.
- Provides an appropriation from the General Revenue Fund.

The bill appears to have a significant negative fiscal impact on DACS. This bill will likely have a positive fiscal impact on the "independent grocery stores and supermarkets" and "community facilities" eligible to receive financial assistance.

FULL ANALYSIS

I. SUBSTANTIVE ANALYSIS

A. EFFECT OF PROPOSED CHANGES:

Present Situation

Food Deserts

Food deserts are urban neighborhoods and rural towns without ready access to fresh, healthy, and affordable food. Instead of supermarkets and grocery stores, these communities may have no food access or are served only by fast food restaurants and convenience stores that offer few healthy, affordable food options. The lack of access contributes to a poor diet and may lead to higher levels of obesity and other diet-related diseases, such as diabetes and heart disease.¹

The U.S. Department of Agriculture's (USDA's) Economic Research Service estimates that 23.5 million people live in food deserts. More than half of those people (13.5 million) are low-income.²

The USDA, the U.S. Department of Treasury (Treasury), and the U.S. Department of Health and Human Services (HHS) identifies a food desert as a census tract with a substantial share of residents who live in low-income areas that have low levels of access to a grocery store or healthy, affordable food retail outlet. Census tracts qualify as food deserts if they meet low-income and low-access thresholds. Such terms are defined as:

- "Low-income communities" have:
 - a poverty rate of 25 percent or greater; or
 - a median family income at or below 80 percent of the area median family income.
- "Low-access communities" have at least 500 persons or at least 33% of the census tract's population living more than one mile from a supermarket or large grocery store (10 miles in the case of non-metropolitan census tracts).³

Healthy Food Financing Initiatives

To decrease the presence of food deserts, several federal and state agencies have undertaken initiatives to increase access to healthy, affordable foods in these communities.

At the federal level, USDA, the Treasury, and HHS work to make funding available in the form of loans, grants, promotions, and other programs to create healthy food options in food deserts.⁴ These programs:

- Provide financial and technical assistance;
- Make funds available through selected rural development and Agricultural Marketing Service programs;
- Provide tax credits; and
- Award competitive grants to community development corporations to support projects that finance grocery stores, farmers markets, and other sources of fresh nutritious food.⁵

The federal programs seek to increase access to whole foods such as fruits, vegetables, whole grains, fat free or low-fat dairy, and lean meats that are perishable (fresh, refrigerated, or frozen) or canned as

well as nutrient-dense foods and beverages encouraged by the 2010 Dietary Guidelines for Americans.⁶

Twenty-seven states have taken some action to address the issue of food deserts. These include creating Healthy Food Financing Initiatives, undertaking studies, expanding financial support, providing low interest loans, studying access to food, and providing tax incentives.⁷

Community Development Financial Institutions (CDFIs)

CDFIs are banks, credit unions, loan funds, microloan funds, or venture capital providers that help families finance their first homes, support community residents starting businesses, and invest in local health centers, schools, or community centers for low income communities.⁸ CDFIs are certified by the CDFI Fund.⁹ The CDFI Fund is an agency within the Treasury that promotes economic revitalization in distressed communities throughout the United States by providing financial assistance and information to CDFIs.¹⁰ Once certified, a CDFI may apply for awards under the CDFI Fund's competitive programs, including the Capital Magnet Fund, CDFI Bond Guarantee Program, Community Development Financial Institutions Program, and Native Initiatives.¹¹

Effect of the Proposed Changes

The bill directs DACS to establish a Healthy Food Financing Initiative (program) that comprises and coordinates the use of federal, state, and private loans and grants, federal tax credits, and other forms of financial assistance. This financial assistance must be used for the construction, rehabilitation, or expansion of independent grocery stores, supermarkets, and community facilities to increase access to fresh produce and other nutritious food in underserved communities.

The bill defines the following terms:

- "Community facility" means a property owned by a nonprofit or for-profit entity or a unit of government in which health and human services are provided and space is offered in a manner that provides increased access to, or delivery or distribution of, food or other agricultural products to encourage public consumption and household purchases of fresh produce or other healthy food to improve the public health and well-being of low-income children, families, and older adults.
- "Independent grocery store or supermarket" means an independently-owned grocery store or supermarket whose parent company does not own more than 40 grocery stores throughout the country based upon ownership conditions as identified in the latest Nielsen TDLinx Supermarket/Supercenter database.
- "Low-income community" means a population census tract, as reported in the most recent U.S. Census Bureau American Community Survey,¹² that meets one of the following criteria:
 - A poverty rate of at least 25 percent;
 - In the case of a low-income community located outside of a metropolitan area, the median family income does not exceed 80 percent of the statewide median family income; or

¹¹ Id.

¹² U.S. Census Bureau, *Our Surveys and Programs*, <https://www.census.gov/programs-surveys.html> (last visited November 20, 2015).

- In the case of a low-income community located inside of a metropolitan area, the median family income does not exceed 80 percent of the statewide median family income or 80 percent of the metropolitan median family income, whichever is greater.
- "Moderate-income community" means a population census tract, as reported in the most recent U.S. Census Bureau American Community Survey, in which the median family income is between 81 and 95 percent of the median family income for the state or metropolitan area.
- "Underserved community" means a distressed urban, suburban, or rural geographic area where a substantial number of residents have low access to a full-service grocery store or supermarket. An area with limited supermarket access must be:
 - A census tract, as determined to be an area with low access by the USDA, as identified in the Food Access Research Atlas;¹³
 - Identified as a limited supermarket access area as recognized by the CDFI Fund;¹⁴ or
 - Identified as an area with low access to a supermarket or grocery store through a methodology that has been adopted for use by another governmental or philanthropic healthy food initiative.

The bill authorizes DACS to contract with one or more nonprofit organizations or Florida-based federally certified CDFI to administer the program. To be eligible to contract with DACS to administer the program, the CDFI or nonprofit organization must demonstrate:

- Prior experience in healthy food financing;
- Support from the CDFI Fund within the Treasury;
- The ability to manage and operate lending and tax credit programs; and
- The ability to assume full financial risk for loans made under the program.

The bill directs DACS to establish program guidelines, raise matching funds, promote the program statewide, evaluate applicants, underwrite and disburse grants and loans, and monitor program compliance and impact. To carry out these directives, the bill authorizes DACS to contract with a third-party. This third-party must report to DACS annually.

The bill directs DACS to create eligibility guidelines and provide financing through an application process. Eligible projects must:

- Be located in an underserved community;
- Primarily serve low-income or moderate-income communities; and
- Provide for the construction of new independent grocery stores or supermarkets; the renovation or expansion of, including infrastructure upgrades to, existing independent grocery stores or supermarkets; or the construction, renovation or expansion of, including infrastructure upgrades to, community facilities to improve the availability and quality of fresh produce and other healthy foods.

To receive program financing, applicants must:

- Demonstrate the capacity to successfully implement the project and the likelihood that the project will be economically self-sustaining;
- Demonstrate the ability to repay the loan; and
- Agree, as an independent grocery store or supermarket, for at least 5 years, to:
 - Accept Supplemental Nutrition Assistance Program (SNAP)¹⁵ benefits;
 - Apply to accept Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)¹⁶ benefits and accept such benefits if approved;

¹⁴ CDFI Fund, *CDFI Information Mapping System*, <https://www.cdfifund.gov/Pages/mapping-system.aspx> (last visited November 18, 2015).

¹⁵ SNAP is a federal program that offers nutrition assistance to millions of eligible, low-income individuals and families and provides economic benefits to communities. USDA, *Supplemental Nutrition Assistance Program*, <http://www.fns.usda.gov/snap/supplemental-nutrition-assistance-program-snap> (last visited November 18, 2015).

¹⁶ WIC is a federal program that provides grants to states for supplemental foods, health care referrals, and nutrition education for low-income pregnant, breastfeeding, and non-breastfeeding postpartum women, and to infants and children up to age five who are found to

- Allocate at least 30 percent of food retail space for the sale of perishable foods, which may include fresh or frozen dairy products, fresh produce, and fresh meats, poultry, and fish;
- Comply with all data collection and reporting requirements established by DACS; and
- Promote the hiring of local residents.

The bill provides an exception to the 30 percent minimum requirement for food retail space for corner stores, bodegas, and other non-traditional grocery stores if the funding will be used for refrigeration displays, or other one-time capital expenditures to promote the sale of fresh produce or perishables.

The bill requires DACS or its third-party administrator to determine which projects receive financing by:

- Giving preference to local Florida-based grocers or local business owners with experience in grocery stores and to grocers and business owners with a business plan model that includes written documentation of opportunities to purchase from Florida farmers and growers before seeking out-of-state purchases;
- Considering the level of need in the area to be served;
- Considering the degree to which the project will have a positive economic impact on the underserved community, including the creation or retention of jobs for local residents; and
- Considering other criteria as may be determined by DACS.

The bill authorizes financing for selected projects for the following purposes:

- Site acquisition and preparation;
- Construction and build-out costs;
- Equipment and furnishings;
- Workforce training or security;
- Predevelopment costs, such as market studies and appraisals;
- Energy-efficiency measures;
- Working capital for first-time inventory and startup costs; and
- Other purposes as may be determined by DACS or its third-party administrator.

The bill requires DACS to transfer funds received from loan repayments to the General Revenue Fund within 15 days of repayment.

The bill requires DACS to adopt rules to implement the program and provides an expiration date of July 1, 2021.

The bill requires DACS to submit a report by March 1, 2021, to the President of the Senate and the Speaker of the House of Representatives on:

- The projects funded;
- Geographic distribution of projects;
- Program costs; and
- Program outcomes including the number and type of jobs created and health initiatives associated with the program.

Lastly, the bill provides a nonrecurring appropriation of \$500,000 from the General Revenue Fund for the purpose of implementing this act.

B. SECTION DIRECTORY:

Section 1. Creates the Healthy Food Financing Initiative Pilot Program.

Section 2. Provides an appropriation.

Section 3. Provides an effective date of July 1, 2016.

II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT

A. FISCAL IMPACT ON STATE GOVERNMENT:

1. Revenues:

None.

2. Expenditures:

The bill appears to have a significant negative fiscal impact on DACS. DACS estimates \$64,499 in recurring funds and \$3,999 in nonrecurring funds for 1 OPS and associated expenses will be needed to implement the program.¹⁷

DACS is required to adopt rules, which can be absorbed within existing resources.

B. FISCAL IMPACT ON LOCAL GOVERNMENTS:

1. Revenues:

None.

2. Expenditures:

None.

C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:

The bill may have a positive fiscal impact on the private sector since “independent grocery stores and supermarkets” and “community facilities,” as part of the program, will be eligible to receive financial assistance in the form of grants and loans to improve or set up stores to provide access to healthy food and fresh produce.

D. FISCAL COMMENTS:

The bill requires DACS to transfer funds received from loan repayments to the General Revenue Fund within 15 days of repayment.

The bill provides a nonrecurring appropriation of \$500,000 from the General Revenue Fund for the purpose of implementing this act.

III. COMMENTS

A. CONSTITUTIONAL ISSUES:

1. Applicability of Municipality/County Mandates Provision:

Not Applicable. This bill does not appear to affect county or municipal governments.

2. Other:

None.

B. RULE-MAKING AUTHORITY:

The bill requires DACS to adopt rules to administer the program.

STORAGE NAME: h0153d.SAC
DATE: 2/16/2016

C. DRAFTING ISSUES OR OTHER COMMENTS:

None.

IV. AMENDMENTS/ COMMITTEE SUBSTITUTE CHANGES

On December 2, 2015, the Agriculture & Natural Resources Subcommittee adopted two amendments and reported the bill favorably with committee substitute. The amendments changed the definition of “independent grocery store or supermarket” to require such stores not to be owned by a parent corporation who owns more than 40 grocery stores throughout the country based upon ownership conditions as identified in the latest Nielsen TDLinX Supermarket/Supercenter database, rather than the Nielsen Trade Dimensions grocery store database, and clarified that the nonprofit organizations must also meet specified criteria to be eligible to contract with DACS to implement the program.

On February 9, 2016, the Agriculture & Natural Resources Appropriation Subcommittee adopted a strike all amendment and reported the bill favorably with committee substitute. The amendment:

- Establishes the Healthy Food Financing Initiative Pilot Program;
- Increases the poverty rate from 20 to 25 percent as one of the criteria for the definition of “low-income community”;
- Requires DACS to submit a report to the Legislature by March 1, 2021;
- Requires DACS to transfer funds received from loan repayments to the General Revenue Fund;
- Provides an expiration date of July 1, 2021, for the pilot program; and
- Provides an appropriation from the General Revenue Fund.

The staff analysis is drafted to reflect the committee substitute as approved by the Agriculture and Natural Resources Appropriation Subcommittee.
