HOUSE OF REPRESENTATIVES STAFF ANALYSIS

BILL #: PCB ENUS 12-01 Repeal of the Florida Institute for Nuclear Detection and Security  
SPONSOR(S): Energy & Utilities Subcommittee  
TIED BILLS: None. IDEN./SIM. BILLS:

| REFERENCE                                    | ACTION | ANALYST                     | STAFF DIRECTOR or BUDGET/POLICY CHIEF |
|--|--------|-----------------------------|---------------------------------------|
| Orig. Comm.: Energy & Utilities Subcommittee |        | Whittier <i>[Signature]</i> | Collins <i>[Signature]</i>            |

SUMMARY ANALYSIS

In 2004, the Legislature created the Florida Institute for Nuclear Detection and Security (FINDS or Institute) within the Department of Nuclear Engineering and Radiological Sciences at the University of Florida (UF or University). FINDS was to serve as a "design-basis center for research, development, testing, and engineering projects that directly address and satisfy critical nuclear detection and security needs facing the state and the nation." The Institute was to be headed by a director who possessed a national reputation in the field of nuclear sciences and was to be appointed by the Dean of the College of Engineering at UF. The activities of FINDS were to be directed by an eight-member Board of Advisors, serving two-, three-, and four-year terms.

The Institute was to solicit and receive state, federal, and private funds for the purpose of conducting research and development in the area of nuclear security technology. Faculty at the UF College of Engineering report that no monies were appropriated nor obtained to fund FINDS and it was staffed by only two faculty members who have since left the University. When funding did not materialize, the Institute's Board of Advisors was not established.

According to UF faculty, although still authorized within the statutes, the Institute is not active, it appears there were no records nor reports that were issued by the Institute, and the research that would have been done by FINDS is being conducted within other areas of the University and is not dependent on the Institute.

The bill repeals the obsolete Institute and its advisory board from the statutes.

There appears to be no fiscal impact on state or local governments.

## FULL ANALYSIS

### I. SUBSTANTIVE ANALYSIS

#### A. EFFECT OF PROPOSED CHANGES:

##### Present Situation

In 2004, the Legislature created the Florida Institute for Nuclear Detection and Security (FINDS or Institute) within the Department of Nuclear Engineering and Radiological Sciences at the University of Florida (UF or University).<sup>1</sup> FINDS was to serve as a “design-basis center for research, development, testing, and engineering projects that directly address and satisfy critical nuclear detection and security needs facing the state and the nation.”<sup>2</sup> The Institute was to be headed by a director who possessed a national reputation in the field of nuclear sciences and was to be appointed by the Dean of the College of Engineering at UF.

Activities of the Institute were to include, but not be limited to:<sup>3</sup>

- The design and testing of innovative interrogation, detection, and assessment devices for monitoring nuclear material;
- Exploring the development of devices for identification of isotopes and materials in structural, agricultural, and biological systems of various types; and
- Contributing to the education and training of high-quality scientists and engineers in the application of engineering solutions in homeland security, detection, imaging, and interrogation of systems, and nonproliferation policy.

Application areas were to include, but not be limited to:<sup>4</sup>

- Portal monitoring, wide area search, and cargo screening applications;
- Structural monitoring for post-tensioned bridges;
- Biological and agricultural monitoring; and
- Development of nonproliferation policies.

The activities of FINDS were to be directed by an eight-member Board of Advisors,<sup>5</sup> serving two-, three-, and four-year terms.<sup>6</sup>

The Institute was to solicit and receive state, federal, and private funds for the purpose of conducting research and development in the area of nuclear security technology.<sup>7</sup> Faculty at the UF College of Engineering report that no monies were appropriated nor obtained to fund FINDS and it was staffed by only two faculty members who have since left the University. When funding did not materialize, the Board of Advisors that was intended to manage the Institute was not established.<sup>8</sup>

According to UF faculty, although still authorized within the statutes, the Institute is not active, there appear to be no records nor reports that were issued by the Institute, and the research that would have been done by FINDS is being conducted within other areas of the University and is not dependent on the Institute.<sup>9</sup>

### **Effects of Proposed Changes**

This bill repeals the obsolete Florida Institute for Nuclear Detection and Security and its advisory board from the statutes.

#### **B. SECTION DIRECTORY:**

**Section 1.** Repeals s. 1004.63, F.S., relating to the Florida Institute for Nuclear Detection and Security.

**Section 2.** Provides an effective date of July 1, 2012.

## **II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT**

#### **A. FISCAL IMPACT ON STATE GOVERNMENT:**

1. Revenues:

None.

2. Expenditures:

None.

#### **B. FISCAL IMPACT ON LOCAL GOVERNMENTS:**

1. Revenues:

None.

2. Expenditures:

None.

#### **C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:**

None.

#### **D. FISCAL COMMENTS:**

None.

## **III. COMMENTS**

#### **A. CONSTITUTIONAL ISSUES:**

1. Applicability of Municipality/County Mandates Provision:

Not applicable. This bill does not appear to require counties or municipalities to take an action requiring the expenditure of funds, reduce the authority that counties or municipalities have to raise revenue in the aggregate, nor reduce the percentage of state tax shared with counties or municipalities.

---

## HOUSE OF REPRESENTATIVES STAFF ANALYSIS

**BILL #:** HB 695 Development of Oil and Gas Resources

**SPONSOR(S):** Ford

**TIED BILLS:** IDEN./SIM. BILLS: SB 1158

| REFERENCE                          | ACTION | ANALYST   | STAFF DIRECTOR or<br>BUDGET/POLICY CHIEF  |
|------------------------------------|--------|---|---|
| 1) Energy & Utilities Subcommittee |        | Keating  | Collins  |
| 2) Appropriations Committee        |        |   |   |
| 3) State Affairs Committee         |        |   |   |

### SUMMARY ANALYSIS

For purposes of the oil and gas development and production, the Board of Trustees of the Internal Improvement Trust Fund (comprised of the Governor and Cabinet) is authorized to negotiate, sell, and convey leasehold estates in lands whose title is vested in any state board, department, or agency or is vested in the state and controlled and managed by any such board, department or agency. If the Board believes there is a demand for the purchase of oil and gas leases on a portion of the land owned, controlled, or managed by a state board, department, or agency, then the Board must place such oil and gas leases on the market. Applicants for a lease must submit sealed bids to the Board, which, at a public meeting, will consider the bids. In its discretion, the Board may award the lease to the highest and best bidder. If the Board finds that the bids do not represent the fair value of the lease, that the execution of the lease is contrary to the public welfare, that the responsibility of the bidder offering the highest amount has not been established to its satisfaction, or for any other reason, it may reject all bids, give notice and call for new bids, or withdraw the land from the market.

The bill creates an undesignated section of law that, notwithstanding the provisions of chapter 253, F.S., authorizes a land management agency to establish, by contract, a public-private partnership with a business entity if the agency determines that there is an opportunity to develop oil and gas resources from onshore lands owned by a board, department, or agency of the state and that such development would "yield greater, near-term revenue returns for the state." The bill requires a business entity that wishes to enter into a public-private partnership contract to submit to the land management agency a business proposal that describes the exploration for oil or gas resources and the development of state lands for those purposes. The business entity may nominate state land that is to be explored and developed under the public-private partnership contract. The bill specifies the matters that the land management agency must consider and requires that the land management agency select a private partner based on the business proposal.

A public-private partnership contract created under the bill requires approval by the Board and must provide:

- A minimum 3-year period during which the private partner may explore specified state lands by geophysical seismic methods for the feasibility of oil and gas resource development and production.
- A selection process in which the private partner may select prospective parcels of state land for exploration and lease after the geophysical seismic testing.
- A right of first refusal to lease a parcel of state land identified as a result of the geophysical seismic exploration for the development and production of oil or gas resources for a term of at least 5 years.
- Negotiated royalty rates and a lease bonus.
- Confidentiality for a period of at least 10 years for the geophysical information, seismic interpretation, or geological information developed as a result of the geophysical seismic exploration by the business entity before the selection of lease areas.

The bill's impact on state revenues and expenditures is indeterminate. Some state land management agencies may be required to expend funds to obtain the necessary resources to review proposals and negotiate public-private partnership contracts. The bill may encourage oil and gas exploration and production companies to pursue opportunities to conduct operations on state lands which could provide potential new investment and job growth.

This document does not reflect the intent or official position of the bill sponsor or House of Representatives.

## FULL ANALYSIS

### I. SUBSTANTIVE ANALYSIS

#### A. EFFECT OF PROPOSED CHANGES:

##### Present Situation

Chapter 253, F.S., governs the acquisition, administration, and disposition of state lands.

Pursuant to s. 253.03, F.S., the Board of Trustees of the Internal Improvement Trust Fund<sup>1</sup> (Board) is empowered to acquire, administer, manage, control, supervise, conserve, protect, and dispose of all lands owned by, or which may inure to, the state or any of its agencies, departments, boards, or commissions. The Florida Department of Environmental Protection (DEP), through its Division of State Lands (DSL), serves as staff to the Board.<sup>2</sup>

The Board is directed and authorized to enter into leases for the use, benefit, and possession of public lands by agencies which may properly use and possess them for the benefit of the state.<sup>3</sup> The DSL manages the leases, subleases, easements, use agreements, deed restrictions, reverter revisions, and other approvals for all activities on state-owned lands the title to which is or will be vested in the Board.<sup>4</sup>

Florida has more than 3.8 million acres of conservation lands. Nearly all of this land is open for public recreation and nearly all of the lands require some form of stewardship activity. The DSL leases these lands to state agencies and local governments to manage. The DSL has leased over 500 conservation areas that include parks, preserves, forests, wildlife management areas, and other conservation and recreation areas. The DSL also leases non-conservation lands to state agencies and local governments for uses such as universities, correctional institutions, and other government buildings.

For purposes of the development and production of oil and gas, the Board is authorized to negotiate, sell, and convey leasehold estates in lands whose title is vested in any state board, department, or agency or is vested in the state and controlled and managed by any such board, department or agency.<sup>5</sup> If the Board believes there is a demand for the purchase of oil and gas leases on a portion of the land owned, controlled, or managed by a state board, department, or agency, then the board must place such oil and gas leases on the market.<sup>6</sup> The Board may designate the blocks, tracts, or parcels available for lease. A lease may be made only after public notice, and the lease form must be made publicly available at the Board's office.<sup>7</sup> For lands not already developed for oil or gas, the Board must determine in advance the amount of royalty, never less than one-eighth in kind or in value, and a definite rental, increasing annually after the first 2 years.<sup>8</sup>

Applicants for a lease must submit sealed bids to the Board, which may not be opened until the time and place specified in the public notice.<sup>9</sup> At a public meeting, the Board will consider any and all bids timely submitted for leasing the advertised lands and, in its discretion, may award the lease to the highest and best bidder. If the Board finds that the bids do not represent the fair value of the lease, that the execution of the lease is contrary to the public welfare, that the responsibility of the bidder offering the highest amount has not been established to its satisfaction, or for any other reason, it may reject all bids, give notice and call for new bids, or withdraw the land from the market.<sup>10</sup>

---

<sup>1</sup> The Board is comprised of the Governor, the Attorney General, the Chief Financial Officer, and the Commissioner of Agriculture. Section 253.02(1), F.S.

<sup>2</sup> Section 253.002(1), F.S.

<sup>3</sup> Section 253.03(2), F.S.

<sup>4</sup> <http://www.dep.state.fl.us/lands/use.htm> (viewed on January 23, 2012)

<sup>5</sup> Section 253.51, F.S.

<sup>6</sup> Section 253.52, F.S.

<sup>7</sup> *Id.*

<sup>8</sup> Section 253.53, F.S.

<sup>9</sup> *Id.*

<sup>10</sup> Section 253.54, F.S.

Each lease must be for a primary term no longer than 10 years and must require that, to remain in full force and effect, operations be carried on in good faith and in a skillful and diligent manner with no cessation of more than 30 consecutive days or that oil or gas is being produced from the leased land in paying quantities. Each lease must provide for its termination in the absence of drilling or reworking operations or production of oil or gas in paying quantities.<sup>11</sup>

The Board may require a surety or property bond, an irrevocable letter of credit, or other proof of financial responsibility from each lessee of public land or mineral interest prior to the time the lessee mines, drills, or extracts petroleum, petroleum products, or gas from the land. The surety bond, irrevocable letter of credit, or other proof of financial responsibility serves as security and is to be forfeited to the Board to pay for any damages caused by mining or drilling operations performed by the lessee.<sup>12</sup>

Florida law prohibits oil and gas leases in specified areas except under certain conditions. In particular, no board or agency or the state has the authority to sell, execute, or enter into any such lease relating to any of the following lands, submerged or unsubmerged:

- Lands within the corporate limits of any municipality, unless the governing authority of the municipality shall have first duly consented to the granting or sale of such lease by resolution.
- Lands in the tidal waters of the state, abutting on or immediately adjacent to the corporate limits of a municipality or within 3 miles of such corporate limits extending from the line of mean high tide into such waters, unless the governing authority of the municipality shall have first duly consented to the granting or sale of such lease by resolution.
- Lands on any improved beach, located outside of an incorporated town or municipality, or covering such lands in the tidal waters of the state abutting on or immediately adjacent to any improved beach, or within 3 miles of an improved beach extending from the line of mean high tide into such tidal waters, unless the county commissioners of the county in which such beach is located shall have first duly consented to the granting or sale of such lease by resolution.
- Defined submerged lands in territorial waters.<sup>13</sup>

A person wishing to conduct geophysical operations in search of oil, gas, or minerals must first obtain a permit from the Department of Environmental Protection.<sup>14</sup> The application must contain a statement, in general terms, of the location in which the operation is intended to be conducted. Any information relating to the location of the operation and other information relating to leasing plans, exploration budgets, and other proprietary information that could provide an economic advantage to competitors must be kept confidential by the department for 10 years and exempt from the provisions of s. 119.07(1), F.S., and may not be released to the public without the consent of the person submitting the application.<sup>15</sup>

Whenever geophysical operations are conducted on state-owned mineral lands, the person conducting the operations must provide the Division of Resource Management (the Division) within DEP, acting as agent of the owner of the minerals, a copy of the noninterpreted information derived from the geophysical operations. Any information received by the Division must, upon request of the person conducting the geophysical operations, be held confidential for 10 years from the date of receipt by the division and is exempt from disclosure under any state statute.<sup>16</sup>

---

<sup>11</sup> Section 253.55, F.S.

<sup>12</sup> Section 253.571, F.S. Damages include, but are not limited to, air, water, and ground pollution, destruction of wildlife or marine productivity and any other damage which impairs the health and general welfare of the citizens of the state.

<sup>13</sup> Section 253.61, F.S.

<sup>14</sup> Section 377.2408 and 377.2424, F.S.

<sup>15</sup> Section 377.2408, F.S.

<sup>16</sup> Section 377.2409, F.S.

## Effect of Proposed Changes

The bill creates an undesignated section of law that, notwithstanding the provisions of chapter 253, F.S., authorizes a land management agency to establish a public-private partnership with a business entity if the agency determines that there is an opportunity to develop oil and gas resources from onshore lands owned by a board, department, or agency of the state and that such development would “yield greater, near-term revenue returns for the state.”

The bill requires a business entity that wishes to enter into a public-private partnership to submit to the land management agency a business proposal that describes the exploration for oil or gas resources and the development of state lands for those purposes. The business entity may nominate state land that is to be explored and developed under the public-private partnership. The proposal must provide an estimate of the revenues that the project is expected to generate for the state.

The land management agency must review the proposal in a timely manner and “in a manner that is consistent with contemporary industry practices.” The bill requires that the geophysical seismic exploration must be of a duration consistent with industry practices. The geophysical data acquired and the subsequent interpretation must be made available to the land management agency or its representatives for review during the period of geophysical seismic exploration, but the bill provides that this information shall remain in the sole possession of the business entity until the business entity has selected the lease areas.

The bill requires that the land management agency select a private partner based on the business proposal. In selecting a private partner, the land management agency must consider, at a minimum, “the technical quality of the exploration program proposed and the proposed timetable of geophysical and drilling activities which expedites the potential for generating revenues.” If more than one business entity submits a proposal for substantially the same area, the land management agency must evaluate each proposal and select the proposal that it finds will provide the best value for the state.

The bill provides that the public-private partnership must be established through a contract that provides for the following:

- A minimum 3-year period during which the private partner may explore specified state lands by geophysical seismic methods for the feasibility of oil and gas resource development and production.
- A selection process in which the private partner may select prospective parcels of state land for exploration and lease after the geophysical seismic testing.
- A right of first refusal to lease a parcel of state land identified as a result of the geophysical seismic exploration for the development and production of oil or gas resources for a term of at least 5 years.
- Negotiated royalty rates and a lease bonus.
- Confidentiality for a period of at least 10 years for the geophysical information, seismic interpretation, or geological information developed as a result of the geophysical seismic exploration by the business entity before the selection of lease areas.

The bill provides that this contract must be approved by the Board of Trustees of the Internal Improvement Trust Fund in order to be legally binding on the State of Florida. The bill further provides that the financial, technical, and operational risk for the exploration, development, and production of oil and gas resources is the responsibility of the private business entity.

The bill provides an alternative mechanism for obtaining leasing rights to develop oil and gas resources on certain state lands that departs from current law in a number of ways:

- The business entity, rather than the Board, chooses the state lands designated for lease for development and production of oil and gas.
- The business entity obtains a contractual right of first refusal to lease the state lands it identifies for development and production of oil and gas resources, rather than the Board publicly

soliciting and receiving sealed bids and having the discretion to award the lease to the highest and best bidder or reject all bids and withdraw the land from the market.

- The business entity negotiates royalty rates and a lease bonus with the land management agency, rather than the Board determining the amount of royalty in advance based on the statutory minimum of one-eighth in kind or in value, and a definite, escalating rental.
- The business entity retains sole possession of geophysical data it produces (but would make it available for review by land management agency or its representatives), rather than the state holding the information as confidential and exempt from disclosure under the public records law.
- The bill does not appear to require the business entity to provide a surety or property bond, an irrevocable letter of credit, or other proof of financial responsibility as security to pay for any damages caused by mining or drilling operations performed by the entity.

The bill states in one instance that a land management agency *may participate* in a public-private partnership but states elsewhere that the land management agency, after receiving and reviewing a business proposal or proposals, *shall select* a private partner. Thus, it is not clear whether the bill permits or requires a land management agency to enter into such a partnership. If the land management agency has discretion, the only specific criteria that a land management agency must use in order to exercise its discretion is to consider the technical quality of the exploration program proposed and the proposed timetable of geophysical and drilling activities which expedites the potential for generating revenues.

#### B. SECTION DIRECTORY:

**Section 1.** Creates an undesignated section of law establishing a process that allows land management agencies to create public-private partnerships with business entities to explore for oil and gas resources and to develop such resources on state lands.

**Section 2.** Provides an effective date of July 1, 2012.

## II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT

#### A. FISCAL IMPACT ON STATE GOVERNMENT:

##### 1. Revenues:

The bill's impact on state revenues is indeterminate. The impact will depend on the response of oil and gas exploration and production companies, the terms of any public-private partnership contracts negotiated with such companies by land management agencies, and actual oil and gas production.

##### 2. Expenditures:

The bill's impact on state expenditures is indeterminate. The bill is not clear as to whether the land management agencies have the discretion to decline to select a private partner after receiving and reviewing a public-private partnership proposal. If the land management agencies do not retain this discretion, these agencies may be required to expend funds to obtain the necessary resources to review proposals and negotiate public-private partnership contracts.

#### B. FISCAL IMPACT ON LOCAL GOVERNMENTS:

##### 1. Revenues:

None.

##### 2. Expenditures:

None.

C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:

The bill may encourage oil and gas exploration and production companies to pursue opportunities to conduct operations on state lands which could provide potential new investment and job growth.

D. FISCAL COMMENTS:

None.

### III. COMMENTS

A. CONSTITUTIONAL ISSUES:

1. Applicability of Municipality/County Mandates Provision:

Not applicable. This bill does not appear to: require counties or municipalities to spend funds or take an action requiring the expenditure of funds; reduce the authority that counties or municipalities have to raise revenues in the aggregate; or reduce the percentage of a state tax shared with counties or municipalities.

2. Other:

The bill may create a new public records exemption. Section 377.2409, F.S., provides that any noninterpreted information derived from the geophysical operations formation received by DEP's Division of Resource Management must, upon request of the person conducting the geophysical operations, be held confidential for 10 years from the date of receipt by the division and is exempt from disclosure under any state statute. The bill would create an exemption for geophysical information, seismic interpretation, or geological information developed as a result of geophysical seismic exploration and provided to land management agencies. Article I, Section 24, of the Florida Constitution provides that any new exemption from the state's public records laws must be the single subject of a separate bill.

B. RULE-MAKING AUTHORITY:

Not applicable.

C. DRAFTING ISSUES OR OTHER COMMENTS:

The bill states in one instance that a land management agency *may* participate in a public-private partnership but states elsewhere that the land management agency, after receiving and reviewing a business proposal or proposals, *shall* select a private partner. Thus, it is not clear whether the bill permits or requires a land management agency to enter into such a partnership.

The bill provides that a land management agency must review a business proposal in a timely manner. The bill does not define what may be considered timely or untimely.

### IV. AMENDMENTS/ COMMITTEE SUBSTITUTE CHANGES

29 agency of the state may provide the opportunity to produce  
 30 higher, near-term revenues to the state, and

31 WHEREAS, the monetary reward for discovering new reserves  
 32 of oil and gas deposits may be significant, and

33 WHEREAS, the exploration for oil and gas deposits by three-  
 34 dimensional, geophysical seismic methods and production, with  
 35 its related infrastructure, involving directional drilling and  
 36 horizontal drilling, although costly, is more thorough and  
 37 provides more data than older methods of exploration and  
 38 production in use over the past 50 years, NOW, THEREFORE,

39  
 40 Be It Enacted by the Legislature of the State of Florida:

41  
 42 Section 1. (1) DUTIES; AUTHORITY.—Notwithstanding the  
 43 provisions in chapter 253, Florida Statutes, if a land  
 44 management agency determines that there is an opportunity to  
 45 develop oil and gas resources on onshore lands owned by a board,  
 46 department, or agency of this state to yield greater, near-term  
 47 revenue returns for the state, the land management agency may  
 48 participate with a business entity authorized to conduct  
 49 business in the state in a public-private partnership contract.

50 (2) PRIVATE-PARTNER RESPONSIBILITIES.—The financial,  
 51 technical, and operational risk for the exploration,  
 52 development, and production of oil and gas resources is the  
 53 responsibility of the private business entity.

54 (3) PROPOSAL SELECTION.—

55 (a) A business entity seeking a public-private partnership  
 56 contract shall submit a business proposal that describes the

57 exploration for oil or gas resources and the development of  
 58 state lands for those purposes. The business entity may nominate  
 59 state land that is to be explored and developed under the  
 60 public-private partnership contract. The proposal shall provide  
 61 an estimate of the revenues that the project is expected to  
 62 generate for the state.

63 (b) The land management agency shall review the business  
 64 proposal in a timely manner and in a manner that is consistent  
 65 with contemporary industry practices. The geophysical seismic  
 66 exploration shall be of a duration consistent with industry  
 67 practices. The geophysical data acquired and the subsequent  
 68 interpretation shall be made available to the land management  
 69 agency or its representatives for review during the period  
 70 provided for in paragraph (4) (a), but shall remain in the sole  
 71 possession of the business entity until the business entity has  
 72 selected the lease areas.

73 (c) The land management agency shall select a private  
 74 partner based on the business proposal. The land management  
 75 agency's consideration must include, but need not be limited to,  
 76 the technical quality of the exploration program proposed and  
 77 the proposed timetable of geophysical and drilling activities  
 78 which expedites the potential for generating revenues. If more  
 79 than one entity submits a proposal for a public-private  
 80 partnership for substantially the same area, the land management  
 81 agency shall evaluate and select the single proposal that will  
 82 provide the best value for the state.

83 (4) PUBLIC-PRIVATE PARTNERSHIP CONTRACT.-The public-  
 84 private partnership contract shall provide for:

85        (a) A period of 3 years or longer during which the private  
 86 partner may explore specified state lands by geophysical seismic  
 87 methods for the feasibility of oil and gas resource development  
 88 and production;

89        (b) A selection process in which the private partner may  
 90 select prospective parcels of state land for exploration and  
 91 lease after the geophysical seismic testing;

92        (c) A first right of refusal to lease a parcel of state  
 93 land identified as a result of the geophysical seismic  
 94 exploration for the development and production of oil or gas  
 95 resources for a term of at least 5 years;

96        (d) Negotiated royalty rates and a lease bonus; and

97        (e) Confidentiality for a period of at least 10 years for  
 98 the geophysical information, seismic interpretation, or  
 99 geological information developed as a result of the geophysical  
 100 seismic exploration by the business entity before the selection  
 101 of lease areas.

102        (5) APPROVAL OF CONTRACT.—The proposed public-private  
 103 partnership contract must be approved by the Cabinet sitting as  
 104 the Board of Trustees of the Internal Improvement Trust Fund in  
 105 order to be legally binding on the State of Florida.

106        Section 2. This act shall take effect July 1, 2012.

1 Committee/Subcommittee hearing bill: Energy & Utilities  
2 Subcommittee

3 Representative Ford offered the following:

4  
5 **Amendment (with title amendment)**

6 Remove everything after the enacting clause and insert:

7 Section 1. (1) DUTIES; AUTHORITY.—Notwithstanding the  
8 provisions in chapter 253, Florida Statutes, if a land  
9 management agency determines that there is an opportunity to  
10 develop oil and gas resources under onshore lands owned by a  
11 board, department, or agency of this state to yield greater,  
12 near-term revenue returns for the state, the land management  
13 agency may participate with a business entity authorized to  
14 conduct business in the state in a public-private partnership  
15 contract.

16 (2) PRIVATE-PARTNER RESPONSIBILITIES.—The financial,  
17 technical, and operational risk for the exploration,  
18 development, and production of oil and gas resources is the  
19 responsibility of the private business entity.

Amendment No.

20 (3) PROPOSAL SELECTION.-

21 (a) A business entity seeking a public-private partnership  
22 contract shall submit a business proposal that describes the  
23 exploration for oil or gas resources and the development of  
24 state lands for those purposes. The business entity may nominate  
25 state land that is to be explored and developed under the  
26 public-private partnership contract. The proposal shall provide  
27 an estimate of the revenues that the project is expected to  
28 generate for the state.

29 (b) The land management agency shall review the business  
30 proposal in a timely manner and in a manner that is consistent  
31 with contemporary industry practices. The geophysical seismic  
32 exploration, drilling, and production activities proposed shall  
33 be of a duration consistent with industry practices.

34 (c) The land management agency shall select a private  
35 partner based on the business proposal. The land management  
36 agency's consideration must include, but need not be limited to,  
37 the technical quality of the exploration program proposed and  
38 the proposed timetable of geophysical and drilling activities  
39 which expedites the potential for generating revenues. If more  
40 than one entity submits a proposal for a public-private  
41 partnership for substantially the same area, the land management  
42 agency shall evaluate and select the single proposal that will  
43 provide the best value for the state.

44 (d) The geophysical data acquired and the subsequent  
45 interpretation shall be made available to the land management  
46 agency or its representatives for review during the period  
47 provided in paragraph (4)(a), but shall remain in the sole

Amendment No.

48 possession of the business entity until the business entity has  
49 selected the lease areas.

50 (4) PUBLIC-PRIVATE PARTNERSHIP CONTRACT.--The public-  
51 private partnership contract shall provide for:

52 (a) A period of 3 years or longer during which the private  
53 partner may explore specified state lands by geophysical seismic  
54 methods for the feasibility of oil and gas resource development  
55 and production;

56 (b) A selection process after geophysical operations are  
57 concluded in which the private partner may select and lease  
58 prospective parcels of state land for the purpose of exploration  
59 and production;

60 (c) The leasing of state lands identified as a result of  
61 the geophysical seismic operations, which shall be for a term of  
62 at least 5 years; and

63 (d) Negotiated royalty rates and a lease bonus.

64 (5) APPROVAL OF CONTRACT.--The proposed public-private  
65 partnership contract must be approved by the Governor and  
66 Cabinet sitting as the Board of Trustees of the Internal  
67 Improvement Trust Fund in order to be legally binding on the  
68 State of Florida.

69 Section 2. This act shall take effect upon becoming a law.  
70

COMMITTEE/SUBCOMMITTEE AMENDMENT

Bill No. HB 695 (2012)

Amendment No.

75 An act relating to the development of oil and gas resources;  
76 authorizing a land management agency to enter into a public-  
77 private partnership with a business entity to develop oil and  
78 gas resources upon onshore state lands if the development yields  
79 near-term revenues for the state; providing that the financial,  
80 technical, and operational risk for the exploration,  
81 development, and production of oil and gas resources is the  
82 responsibility of the private business entity; requiring that a  
83 business entity seeking a public-private partnership contract  
84 submit a business proposal to the agency for review; specifying  
85 the information to be included in the business proposal;  
86 providing criteria for the agency to use in selecting the  
87 exploration proposal by a business entity; requiring that the  
88 geophysical data and the subsequent interpretation be made  
89 available to the agency or its representative for review but  
90 remain in the possession of the business entity; providing  
91 criteria for the public-private partnership contract; requiring  
92 a proposed public-private partnership contract to be approved by  
93 the Governor and Cabinet sitting as the Board of Trustees of the  
94 Internal Improvement Trust Fund; providing an effective date.

95 WHEREAS, the exploration and development of oil and gas deposits  
96 under onshore lands owned by a board, department, or agency of  
97 the state may provide the opportunity to produce higher, near-  
98 term revenues to the state, and

99 WHEREAS, the monetary reward for discovering new reserves  
100 of oil and gas deposits may be significant, and

101 WHEREAS, the exploration for oil and gas deposits via  
102 modern three-dimensional, geophysical seismic methods and

HOUSE OF REPRESENTATIVES STAFF ANALYSIS

BILL #: HB 1391 Economic Development
SPONSOR(S): Kreegel
TIED BILLS: IDEN./SIM. BILLS: SB 1878

Table with 4 columns: REFERENCE, ACTION, ANALYST, STAFF DIRECTOR or BUDGET/POLICY CHIEF. Row 1: 1) Energy & Utilities Subcommittee, Keating, Collins. Row 2: 2) Business & Consumer Affairs Subcommittee. Row 3: 3) State Affairs Committee.

SUMMARY ANALYSIS

Babcock Ranch is "Southwest Florida's City of Tomorrow" and a "sustainable, environmentally sensitive, green community" planned for development in Charlotte County that bills itself as a "living laboratory for research on energy efficiency, emerging technologies and true green living."

The bill creates the "Babcock Sustainable Community Demonstration Project Act."

The bill creates s. 288.036, F.S., which provides for the certification of projects that meet specified standards as "Sustainable Community Demonstration Projects" ("projects" or "project"). Such projects must demonstrate "the catalytic economic, technological, and environmental benefits of a prototypical community as a living laboratory for accelerating economic development through innovative technological infrastructure and capital investment, including clean renewable energy systems and smart grid technologies."

The bill also creates s. 366.94, F.S., which authorizes the Public Service Commission (PSC) to approve the recovery of costs incurred by a "provider" for "renewable energy generating facilities that emit zero greenhouse gases at the point of generation, have integrated smart grid infrastructure, and are constructed and operated as part of a [certified] Sustainable Community Demonstration Project."

The DEO and the PSC may need to dedicate or acquire resources to implement their respective responsibilities under the bill, though it is not clear at this point whether additional funding for either agency would be needed. The Revenue Estimating Conference has not addressed the impacts of this bill.

To the extent that the bill results in the development and construction of new renewable energy generating facilities and smart grid infrastructure, investment in these facilities will likely generate a number of design and construction jobs and a smaller number of permanent jobs to operate and maintain the facilities. The costs of these facilities would be recovered through the utility's environmental cost recovery charge authorized under s. 366.8255, F.S., which is applied to the rates of all customers of the utility.

## FULL ANALYSIS

### I. SUBSTANTIVE ANALYSIS

#### A. EFFECT OF PROPOSED CHANGES:

##### Present Situation

Babcock Ranch is a “sustainable, environmentally sensitive, green community” planned for development in Charlotte County.<sup>1</sup> According to its website, “Babcock Ranch is the first city planned to be powered by the sun, with the majority of its electric needs generated from the largest on-site solar photovoltaic energy facility powering any city on earth,”<sup>2</sup> a \$300 million solar photovoltaic facility constructed by Florida Power & Light Company (FPL) with an initial generating capacity of 75 megawatts (MW).<sup>3</sup> In addition, the planned community would allow residents and companies to program their homes and businesses through an advanced electricity distribution network, or “Smart Grid.” This Smart Grid would provide real-time monitoring and remote programming of every outlet in a house or business in the community and would provide for greater reliability within the community’s distribution system.<sup>4</sup>

Babcock Ranch’s website describes the planned community further:

Homes, businesses, and government buildings will all be built using groundbreaking energy-efficient methods and materials. Ultra-modern electric vehicles will glide along avenues beneath the glow of solar-powered street lamps, plugging in to recharge at convenient community-wide recharging stations. Ingenious, revolutionary Smart Grid technologies will monitor and manage energy use while Smart Home technology will allow residents to operate their homes at maximum efficiency, thereby reducing energy costs. For businesses, we’ll help imaginative companies move from research and development into implementation – demonstrating the benefits of widespread adoption of green technologies powered by clean, renewable energy.<sup>5</sup>

Babcock Ranch bills itself as a “living laboratory for research on energy efficiency, emerging technologies and true green living.”<sup>6</sup>

Current law authorizes the Public Service Commission (PSC) to approve cost recovery for certain economic development expenses incurred by public utilities.<sup>7</sup> These expenses are limited to the following:

- Expenditures for operational assistance, including the participation in trade shows and prospecting missions with state and local entities.
- Expenditures for assisting state and local governments in the design of strategic plans for economic development activities.
- Expenditures for marketing and research services, including assisting local governments in marketing specific sites for business and industry development or recruitment, and assisting local governments in responding to inquiries from business and industry concerning the development of specific sites.

Current law does not include economic development impacts as matters that the PSC must consider in determining whether to approve cost recovery for new power plants, including renewable energy projects.

<sup>6</sup> [http://www.babcockranchflorida.com/living\\_laboratory.asp](http://www.babcockranchflorida.com/living_laboratory.asp) (viewed on January 22, 2012)

<sup>7</sup> Section 288.035, F.S.

Absent specific authority to recover the costs of renewable energy projects, public utilities will likely not invest in such projects due to the costs and/or capacity benefits of such projects relative to traditional generation resources. In reviewing the need for proposed electrical power plants, the PSC must consider, among other things, whether the proposed plant is the most cost-effective alternative available and the need for electrical system reliability and integrity.<sup>8</sup> In most cases, a renewable energy facility will not be the most cost-effective alternative available, and in some instances the facility may not make a significant contribution to electrical system reliability and integrity as compared to other resources. Even for renewable energy projects that do not require a determination of need from the PSC, the utility will be permitted to recover investment in such projects only if the PSC finds that the funds were prudently invested.<sup>9</sup>

A non-utility entity that develops an electrical generation project and sells power at retail to the public is considered under Florida law to be a “public utility” subject to regulation by the PSC.<sup>10</sup>

### **Effect of Proposed Changes**

The bill creates the “Babcock Sustainable Community Demonstration Project Act.”

The bill creates s. 288.036, F.S., which provides for the certification of projects that meet specified standards as “Sustainable Community Demonstration Projects” (“projects” or “project”). Such projects must demonstrate “the catalytic economic, technological, and environmental benefits of a prototypical community as a living laboratory for accelerating economic development through innovative technological infrastructure and capital investment, including clean renewable energy systems and smart grid technologies.”

The bill also establishes a list of items that a Sustainable Community Demonstration Project must be designed to demonstrate. Pursuant to the provisions created by the bill as s. 288.036(3), F.S., a project must be designed to demonstrate the following:

- The economic feasibility and viability of clean renewable energy systems and smart grid infrastructure and technologies.
- The affordability and appeal of a sustainable smart community to industry and residents.
- The ability to attract a cluster of complementary industries and stimulate new capital investment in sustainable innovation and community infrastructure.
- The efficient management of energy distribution and consumption using smart grid systems to improve grid performance and community design and construction features.
- The incorporation of sustainable community design principles and construction features in a way that promotes health and wellness and the development and use of innovative alternatives in personal transportation, such as electric vehicles.
- The catalytic effect of a renewable energy-centered community and smart grid infrastructure system in spurring job creation.
- The ability to attract companies to this state to invest and create new jobs and industry.
- The stabilization of energy prices over time.
- The opportunities to enter into partnerships with the State University System in conducting research in innovative clean energy and smart technology communities and technologies and the translation of that research into business opportunities.
- The effectiveness of enhanced building techniques and design criteria in providing storm safety.

The bill requires the Department of Economic Opportunity (DEO) to review and certify projects as Sustainable Community Demonstration Projects. Pursuant to the provisions created by the bill as s.

---

<sup>8</sup> Section 403.519, F.S. Pursuant to this section, the PSC must also consider the need for adequate electricity at a reasonable cost, the need for fuel diversity and supply reliability, and whether renewable energy sources and technologies, as well as conservation measures, are utilized to the extent reasonably available.

<sup>9</sup> Section 366.06(1), F.S.

<sup>10</sup> *PW Ventures, Inc. v. Nichols*, 533 So. 2d 281 (Fla. 1988).

288.036(4), F.S., a project must be certified if, in addition to complying with any applicable law, the project:

- Is comprehensive in scope by addressing the full range of community infrastructure, including renewable energy systems, smart grid technologies, data communications networks, alternative transportation mobility systems, sources for powering electric vehicles, digital learning centers, health and wellness features, and storm safety.
- Has in place the permits and entitlements required for primary infrastructure before securing building permits for a particular phase of construction.
- Proposes to produce more electricity from on-site renewable energy generating facilities and distributed rooftop renewable energy facilities than the community is projected to use annually.
- Incorporates and integrates smart grid infrastructure and technology as a tool for improving grid performance; manages energy distribution, transmission, and consumption; maximizes efficiencies; and deploys high-speed digital operating systems and data transmission networks.
- Uses reasonable and customary industry practices in the design and construction of proposed renewable energy systems and smart grid infrastructure.
- Consists of a land area of at least 10,000 contiguous acres and is located within a legislatively created special district or approved development of regional impact.
- Includes a plan for developing project benchmarks and evaluating, measuring, and reporting project results, with the involvement of members of the Florida Energy Systems Consortium and research universities, and extending the application of project knowledge throughout the state in partnership with the State University System.

It is not clear whether DEO, in its review, must consider only the items delineated in s. 288.036(4), F.S., or whether it must also consider whether the project demonstrates each of the items delineated in s. 288.036(3), F.S. Arguably, demonstration of the items delineated in subsection (3) could be considered necessary in order for a project to be found in compliance with “any applicable law” and eligible for certification under subsection (4). It is not clear if this is the intended result.

The bill also creates s. 366.94, F.S., which authorizes the PSC to approve the recovery of costs incurred by a “provider” for “renewable energy generating facilities that emit zero greenhouse gases at the point of generation, have integrated smart grid infrastructure, and are constructed and operated as part of a [certified] Sustainable Community Demonstration Project.” The bill provides that the PSC, in determining whether to approve cost recovery, must consider the “projected long-term stabilization of energy costs and the legislative findings in ss. 366.91(1) and 366.92(1), including, but not limited to:

1. Promoting this state's leadership among competitor states in the development of renewable energy resources;
2. Diversifying the fuel mix;
3. Reducing the growing dependence on fuel sources which results in an outflow of this state's capital;
4. Encouraging new investments in innovation and job creation; and
5. Protecting the economic viability of renewable energy resources in this state.”<sup>11,12</sup>

The bill provides that, for purposes of cost recovery, costs will be considered reasonable and prudent if the provider has used reasonable and customary industry practices in the design, procurement, and construction of the facility and has integrated smart grid infrastructure in a cost-effective manner

---

<sup>11</sup> Section 366.91(1), F.S., states: “The Legislature finds that it is in the public interest to promote the development of renewable energy resources in this state. Renewable energy resources have the potential to help diversify fuel types to meet Florida’s growing dependency on natural gas for electric production, minimize the volatility of fuel costs, encourage investment within the state, improve environmental conditions, and make Florida a leader in new and innovative technologies.”

<sup>12</sup> Section 366.92(1), F.S., states: “It is the intent of the Legislature to promote the development of renewable energy; protect the economic viability of Florida’s existing renewable energy facilities; diversify the types of fuel used to generate electricity in Florida; lessen Florida’s dependence on natural gas and fuel oil for the production of electricity; minimize the volatility of fuel costs; encourage investment within the state; improve environmental conditions; and, at the same time, minimize the costs of power supply to electric utilities and their customers.”

appropriate to the location of the facility. Costs would be recovered through the utility's environmental cost recovery charge authorized under s. 366.8255, F.S., which is applied to the rates of all customers of the utility.<sup>13</sup>

The bill includes provisions that appear to grant both a Sustainable Community Demonstration Project and a provider the authority, individually, to initiate cost recovery proceedings. The bill states that a "provider" must initiate proceedings with the PSC no later than January 1, 2013. The bill also provides, however, that a Sustainable Community Demonstration Project certified by DEO "may use customary and innovative alternatives for financing and recovering prudent and reasonable costs in planned energy infrastructure, such as renewable energy generating facilities and integrated smart grid infrastructure, and may initiate proceedings with the Public Service Commission pursuant to s. 366.94."

The bill establishes requirements for a provider, as part of a cost-recovery proceeding, to report to the PSC certain cost and production information.

#### B. SECTION DIRECTORY:

**Section 1.** Provides that the act may be cited as the "Babcock Sustainable Community Demonstration Project Act."

**Section 2.** Creates s. 288.036, F.S., relating to creation of a Sustainable Community Demonstration Project.

**Section 3.** Creates s. 366.94, F.S., relating to cost recovery for renewable energy as part of a Sustainable Community Demonstration Project.

**Section 4.** Provides an effective date of upon becoming a law.

## II. FISCAL ANALYSIS & ECONOMIC IMPACT STATEMENT

#### A. FISCAL IMPACT ON STATE GOVERNMENT:

##### 1. Revenues:

None.

##### 2. Expenditures:

The bill may require the Department of Economic Opportunity to dedicate or acquire resources to establish the expertise necessary to evaluate proposed Sustainable Community Demonstration

---

<sup>13</sup> Section 366.8255, F.S., establishes a mechanism by which investor-owned electric utilities are authorized to recover specified "environmental compliance costs" through an annual adjustment to their rates. "Environmental compliance costs" includes all costs or expenses incurred by an electric utility in complying with environmental laws or regulations, including, but not limited to:

1. Inservice capital investments, including the electric utility's last authorized rate of return on equity thereon.
2. Operation and maintenance expenses.
3. Fuel procurement costs.
4. Purchased power costs.
5. Emission allowance costs.
6. Direct taxes on environmental equipment.
7. Costs or expenses prudently incurred by an electric utility pursuant to an agreement entered into on or after the effective date of this act and prior to October 1, 2002, between the electric utility and the Florida Department of Environmental Protection and the United States Environmental Protection Agency for the exclusive purpose of ensuring compliance with ozone ambient air quality standards by an electrical generating facility owned by the electric utility.
8. Costs or expenses prudently incurred for the quantification, reporting, and third-party verification as required for participation in greenhouse gas emission registries for greenhouse gases as defined in s. 403.44, F.S.
9. Costs or expenses prudently incurred for scientific research and geological assessments of carbon capture and storage conducted in this state for the purpose of reducing an electric utility's greenhouse gas emissions when such costs or expenses are incurred in joint research projects with Florida state government agencies and Florida state universities.

Projects for certification and to evaluate such projects. The bill may require the Public Service Commission (PSC) to dedicate or acquire resources to evaluate requests for cost recovery under the non-traditional standard of review established by the bill and for rulemaking. It is not clear at this point whether additional funding at these agencies would be needed.

**B. FISCAL IMPACT ON LOCAL GOVERNMENTS:**

1. Revenues:

None.

2. Expenditures:

None.

**C. DIRECT ECONOMIC IMPACT ON PRIVATE SECTOR:**

The bill would allow for the development and construction of new renewable energy generating facilities and smart grid infrastructure in areas certified by the Department of Economic Opportunity as Sustainable Community Demonstration Projects. Investment in these utility facilities would likely generate a number of design and construction jobs and a smaller number of permanent jobs to operate and maintain the facilities. It is not clear if the addition of these facilities in a Sustainable Community Demonstration Project would spur indirectly any additional investment and job growth.

The costs of these facilities would be recovered through the utility's environmental cost recovery charge authorized under s. 366.8255, F.S., which is applied to the rates of all customers of the utility.

**D. FISCAL COMMENTS:**

None.

### **III. COMMENTS**

**A. CONSTITUTIONAL ISSUES:**

1. Applicability of Municipality/County Mandates Provision:

Not applicable. This bill does not appear to: require counties or municipalities to spend funds or take an action requiring the expenditure of funds; reduce the authority that counties or municipalities have to raise revenues in the aggregate; or reduce the percentage of a state tax shared with counties or municipalities.

2. Other:

None.

**B. RULE-MAKING AUTHORITY:**

The bill grants rulemaking authority to the PSC. The PSC is authorized to adopt rules to implement the bill's provisions that require the PSC to review, for purposes of cost recovery, proposed utility investment in certain renewable energy generating facilities constructed as part of a Sustainable Community Demonstration Project.

**C. DRAFTING ISSUES OR OTHER COMMENTS:**

It is not clear whether the Department of Economic Opportunity (DEO), in its review for certification of a proposed Sustainable Community Demonstration Project, must consider only the items delineated in s. 288.036(4), F.S., or whether it must also consider whether the project demonstrates each of the items delineated in s. 288.036(3), F.S. Arguably, demonstration of the items delineated in subsection (3) could be considered necessary in order for a project to be found in compliance with "any applicable

law” and eligible for certification under subsection (4). It is not clear if this is the intended result. If this is not the intended result, it is not clear what purpose is served by the inclusion of subsection (3).

The bill includes provisions that appear to grant both a Sustainable Community Demonstration Project and a provider the authority, individually, to initiate cost recovery proceedings. The bill states that a “provider” must initiate proceedings with the PSC no later than January 1, 2013. The bill also provides, however, that a Sustainable Community Demonstration Project certified by DEO “may use customary and innovative alternatives for financing and recovering prudent and reasonable costs in planned energy infrastructure, such as renewable energy generating facilities and integrated smart grid infrastructure, and may initiate proceedings with the Public Service Commission pursuant to s. 366.94.” (Emphasis added). This latter provision appears to grant extraordinary legal standing to an entity other than a regulated utility or utility customer with respect to a proceeding for recovery of utility costs. First, it would grant a non-utility entity the unique right to petition for cost recovery from a utility’s ratepayers for a project initiated by the non-utility entity. The non-utility entity would be permitted to petition for recovery of electric generation (and transmission and distribution system) costs without regard to a utility’s system needs or requirements. Second, it would likely grant the non-utility entity, as a petitioner, the right to protest or appeal a PSC order on cost recovery when it may not otherwise have legal standing to intervene in such a proceeding.

The bill does not define the term “provider.” From the context, “provider” appears to refer to a regulated public utility, but this is not clear.

The bill establishes the PSC’s authority to approve recovery of costs incurred by a provider for “renewable energy generating facilities that emit zero greenhouse gases at the point of generation, have integrated smart grid infrastructure, and are constructed and operated as part of [a certified project].” The definition of “costs” provided in the bill refers only to costs associated with a “renewable energy generating facility” but does not mention “integrated smart grid infrastructure.” It is not clear if the bill is intended to allow cost recovery (1) for only a renewable energy generating facility with components that allow it to integrate into a smart grid OR (2) for both a renewable energy generating facility AND transmission/distribution/metering infrastructure that could makeup part of a “smart grid.” The bill does not define the term “integrated smart grid infrastructure.”

The bill provides that the PSC, in evaluating a request for cost recovery, must consider “projected long-term stabilization of energy costs.” It is not clear whether this evaluation should be done on a project-specific, utility-wide, or statewide basis.

#### **IV. AMENDMENTS/ COMMITTEE SUBSTITUTE CHANGES**

29        (1) The purpose of this section is to establish the  
 30        Sustainable Community Demonstration Project and to certify  
 31        projects that demonstrate the catalytic economic, technological,  
 32        and environmental benefits of a prototypical community as a  
 33        living laboratory for accelerating economic development through  
 34        innovative technological infrastructure and capital investment,  
 35        including clean renewable energy systems and smart grid  
 36        technologies.

37        (2) The Legislature finds that the Sustainable Community  
 38        Demonstration Project is in the public interest and will advance  
 39        state economic development goals and promote fuel diversity,  
 40        energy independence, and innovation in this state as expressed  
 41        in the legislative findings and intent in ss. 366.91 and 366.92.  
 42        It is the intent of the Legislature that a project certified as  
 43        a Sustainable Community Demonstration Project result in the  
 44        creation of a cluster of high-wage, high-skilled complementary  
 45        technology and communications industries which can become a  
 46        magnet for new capital investment, job creation, and innovation  
 47        in the region and throughout the state, and serve as a model for  
 48        the future development of new communities and the retrofitting  
 49        of existing communities.

50        (3) A project must be designed to demonstrate:

51        (a) The economic feasibility and viability of clean  
 52        renewable energy systems and smart grid infrastructure and  
 53        technologies.

54        (b) The affordability and appeal of a sustainable smart  
 55        community to industry and residents.

56        (c) The ability to attract a cluster of complementary

57 industries and stimulate new capital investment in sustainable  
 58 innovation and community infrastructure.

59 (d) The efficient management of energy distribution and  
 60 consumption using smart grid systems to improve grid performance  
 61 and community design and construction features.

62 (e) The incorporation of sustainable community design  
 63 principles and construction features in a way that promotes  
 64 health and wellness and the development and use of innovative  
 65 alternatives in personal transportation, such as electric  
 66 vehicles.

67 (f) The catalytic effect of a renewable energy-centered  
 68 community and smart grid infrastructure system in spurring job  
 69 creation.

70 (g) The ability to attract companies to this state to  
 71 invest and create new jobs and industry.

72 (h) The stabilization of energy prices over time.

73 (i) The opportunities to enter into partnerships with the  
 74 State University System in conducting research in innovative  
 75 clean energy and smart technology communities and technologies  
 76 and the translation of that research into business  
 77 opportunities.

78 (j) The effectiveness of enhanced building techniques and  
 79 design criteria in providing storm safety.

80 (4) The Department of Economic Opportunity shall certify a  
 81 project as a Sustainable Community Demonstration Project if, in  
 82 addition to complying with any applicable law, the project:

83 (a) Is comprehensive in scope by addressing the full range  
 84 of community infrastructure, including renewable energy systems,

85 smart grid technologies, data communications networks,  
 86 alternative transportation mobility systems, sources for  
 87 powering electric vehicles, digital learning centers, health and  
 88 wellness features, and storm safety.

89 (b) Has in place the permits and entitlements required for  
 90 primary infrastructure before securing building permits for a  
 91 particular phase of construction.

92 (c) Proposes to produce more electricity from on-site  
 93 renewable energy generating facilities and distributed rooftop  
 94 renewable energy facilities than the community is projected to  
 95 use annually.

96 (d) Incorporates and integrates smart grid infrastructure  
 97 and technology as a tool for improving grid performance; manages  
 98 energy distribution, transmission, and consumption; maximizes  
 99 efficiencies; and deploys high-speed digital operating systems  
 100 and data transmission networks.

101 (e) Uses reasonable and customary industry practices in  
 102 the design and construction of proposed renewable energy systems  
 103 and smart grid infrastructure.

104 (f) Consists of a land area of at least 10,000 contiguous  
 105 acres and is located within a legislatively created special  
 106 district or approved development of regional impact.

107 (g) Includes a plan for developing project benchmarks and  
 108 evaluating, measuring, and reporting project results, with the  
 109 involvement of members of the Florida Energy Systems Consortium  
 110 and research universities, and extending the application of  
 111 project knowledge throughout the state in partnership with the  
 112 State University System.

113 (5) A project certified under this section may use  
 114 customary and innovative alternatives for financing and  
 115 recovering prudent and reasonable costs in planned energy  
 116 infrastructure, such as renewable energy generating facilities  
 117 and integrated smart grid infrastructure, and may initiate  
 118 proceedings with the Public Service Commission pursuant to s.  
 119 366.94.

120 Section 3. Section 366.94, Florida Statutes, is created to  
 121 read:

122 366.94 Renewable energy cost recovery as part of a  
 123 Sustainable Community Demonstration Project.-

124 (1) As used in this section, the term:

125 (a) "Costs" include all costs or expenses incurred by a  
 126 provider in siting, licensing, designing, constructing, and  
 127 operating a renewable energy generating facility, including, but  
 128 not limited to, construction costs, inservice capital  
 129 investments, engineering expenses, operation and maintenance  
 130 expenses, and any applicable taxes. This term does not include  
 131 the land on which the facility is constructed.

132 (b) "Renewable energy" has the same meaning as provided in  
 133 s. 366.91(2)(d).

134 (c) "Renewable energy generating facility" or "facility"  
 135 means a facility of less than 75 megawatt gross capacity which  
 136 generates renewable energy, is constructed and operated as part  
 137 of a Sustainable Community Demonstration Project certified under  
 138 s. 288.036, and is part of the electric utility grid for this  
 139 state.

140 (2) To demonstrate the feasibility and viability of

141 renewable energy generating facilities integrated with smart  
 142 grid infrastructure and the economic benefits for this state,  
 143 and as an investment in renewable energy, the commission may  
 144 approve all reasonable and prudent costs incurred by a provider  
 145 under the environmental cost-recovery clause in s. 366.8255 for  
 146 renewable energy generating facilities that emit zero greenhouse  
 147 gases at the point of generation, have integrated smart grid  
 148 infrastructure, and are constructed and operated as part of a  
 149 Sustainable Community Demonstration Project certified under s.  
 150 288.036.

151 (a) When determining whether to approve the recovery of  
 152 costs, the commission shall consider, among other factors, the  
 153 projected long-term stabilization of energy costs and the  
 154 legislative findings and intent in ss. 366.91(1) and 366.92(1),  
 155 including, but not limited to:

- 156 1. Promoting this state's leadership among competitor
- 157 states in the development of renewable energy resources;
- 158 2. Diversifying the fuel mix;
- 159 3. Reducing the growing dependence on fuel sources which
- 160 results in an outflow of this state's capital;
- 161 4. Encouraging new investments in innovation and job
- 162 creation; and
- 163 5. Protecting the economic viability of renewable energy
- 164 resources in this state.

165 (b) For purposes of this section, costs are reasonable and  
 166 prudent if the provider has used reasonable and customary  
 167 industry practices in the design, procurement, and construction  
 168 of the facility and has integrated smart grid infrastructure in

169 a cost-effective manner appropriate to the location of the  
 170 facility.

171 (c) A provider must initiate proceedings with the  
 172 commission no later than January 1, 2013.

173 (d) As part of the proceedings, each provider shall report  
 174 its construction costs, in-service costs, operating and  
 175 maintenance costs, hourly energy production of the renewable  
 176 energy electrical generating facility, and any other information  
 177 deemed relevant by the commission.

178 (3) This section applies only to a facility constructed  
 179 and operated as part of a Sustainable Community Demonstration  
 180 Project certified under s. 288.036.

181 (4) The commission may adopt rules as necessary to  
 182 administer this section.

183 Section 4. This act shall take effect upon becoming a law.

COMMITTEE/SUBCOMMITTEE AMENDMENT

Bill No. HB 1391 (2012)

Amendment No.

2 Subcommittee

3 Representative Kreegel offered the following:

4  
5 **Amendment (with title amendment)**

6 Remove everything after the enacting clause and insert:

7 Section 1. This act may be cited as the "Sustainable  
8 Community Demonstration Project Act."

9 Section 2. Section 288.036, Florida Statutes, is created  
10 to read:

11 288.036 Sustainable Community Demonstration Project.—

12 (1) The purpose of this section is to establish the  
13 Sustainable Community Demonstration Project and to certify  
14 projects that demonstrate the catalytic economic, technological,  
15 and environmental benefits of a prototypical community as a  
16 living laboratory for accelerating economic development through  
17 innovative technological infrastructure and capital investment,  
18 including clean renewable energy systems and smart grid  
19 technologies.

COMMITTEE/SUBCOMMITTEE AMENDMENT

Bill No. HB 1391 (2012)

Amendment No.

20       (2) The Legislature finds that a Sustainable Community  
21 Demonstration Project is in the public interest and will advance  
22 state economic development goals and promote fuel diversity,  
23 energy independence, and innovation in this state as expressed  
24 in the legislative findings and intent in ss. 366.91 and 366.92.  
25 It is the intent of the Legislature that a project certified as  
26 a Sustainable Community Demonstration Project result in the  
27 creation of a cluster of high-wage, high-skilled complementary  
28 technology and communications industries which can become a  
29 magnet for new capital investment, job creation, and innovation  
30 in the region and throughout the state, and serve as a model for  
31 the future development of new communities and the retrofitting  
32 of existing communities.

33       (3) The Department of Economic Opportunity shall certify a  
34 project as a Sustainable Community Demonstration Project if, in  
35 addition to complying with any applicable law other than this  
36 act, the project:

37       (a) Is comprehensive in scope by addressing the full range  
38 of community infrastructure, including renewable energy systems,  
39 smart grid technologies, data communications networks,  
40 alternative transportation mobility systems, sources for  
41 powering electric vehicles, digital learning centers, health and  
42 wellness features, and storm safety.

43       (b) Has in place the permits and entitlements required for  
44 primary infrastructure before securing building permits for a  
45 particular phase of construction.

46       (c) Proposes to meet the majority of its electricity needs  
47 from renewable sources and produce more electricity from on-site

COMMITTEE/SUBCOMMITTEE AMENDMENT

Bill No. HB 1391 (2012)

Amendment No.

48 renewable energy generating facilities and distributed rooftop  
49 renewable energy facilities than the community is projected to  
50 use annually.

51 (d) Incorporates and integrates smart grid infrastructure  
52 and technology as a tool for improving grid performance; manages  
53 energy distribution, transmission, and consumption; maximizes  
54 efficiencies; and deploys high-speed digital operating systems  
55 and data transmission networks.

56 (e) Uses reasonable and customary industry practices in  
57 the design and construction of proposed renewable energy systems  
58 and smart grid infrastructure.

59 (f) Consists of a land area of at least 2,500 contiguous  
60 acres.

61 (g) Includes an accountability plan for developing project  
62 benchmarks and evaluating, measuring, and reporting project  
63 results against the criteria provided in subsection (4), with  
64 the involvement of members of the Florida Energy Systems  
65 Consortium and research universities, and extending the  
66 application of project knowledge throughout the state in  
67 partnership with the State University System. The plan shall  
68 provide for submission of the initial evaluation of project  
69 results to the Department of Economic Opportunity no later than  
70 July 1, 2014.

71 (4) A project is intended to demonstrate:

72 (a) The economic feasibility and viability of clean  
73 renewable energy systems and smart grid infrastructure and  
74 technologies.

COMMITTEE/SUBCOMMITTEE AMENDMENT

Bill No. HB 1391 (2012)

Amendment No.

75 (b) The affordability and appeal of a sustainable smart  
76 community to industry and residents.

77 (c) The ability to attract a cluster of complementary  
78 industries and stimulate new capital investment in sustainable  
79 innovation and community infrastructure.

80 (d) The efficient management of energy distribution and  
81 consumption using smart grid systems to improve grid performance  
82 and community design and construction features.

83 (e) The incorporation of sustainable community design  
84 principles and construction features in a way that promotes  
85 health and wellness and the development and use of innovative  
86 alternatives in personal transportation, such as electric  
87 vehicles.

88 (f) The catalytic effect of a renewable energy-centered  
89 community and smart grid infrastructure system in spurring job  
90 creation.

91 (g) The ability to attract companies to this state to  
92 invest and create new jobs and industry.

93 (h) The stabilization of energy prices over time.

94 (i) The opportunities to enter into partnerships with the  
95 State University System in conducting research in innovative  
96 clean energy and smart technology communities and technologies  
97 and the translation of that research into business  
98 opportunities.

99 (j) The effectiveness of enhanced building techniques and  
100 design criteria in providing storm safety.

101 (5) When part of a project certified under this section, a  
102 provider may use customary and innovative alternatives for

655275 - Strike-All.docx

Published On: 1/24/2012 7:25:37 PM

Amendment No.

103 financing and recovering prudent and reasonable costs in planned  
104 energy infrastructure, such as renewable energy generating  
105 facilities and integrated smart grid infrastructure, and may  
106 initiate proceedings with the Public Service Commission pursuant  
107 to s. 366.94.

108 Section 3. Section 366.94, Florida Statutes, is created to  
109 read:

110 366.94 Renewable energy cost recovery as part of a  
111 Sustainable Community Demonstration Project.-

112 (1) As used in this section, the term:

113 (a) "Costs" include all costs or expenses incurred by a  
114 provider in siting, licensing, designing, constructing, and  
115 operating a renewable energy generating facility and  
116 transmission, distribution and metering systems using integrated  
117 smart grid infrastructure and components. These costs include,  
118 but are not limited to, construction costs, inservice capital  
119 investments, engineering expenses, operation and maintenance  
120 expenses, and any applicable taxes. This term does not include  
121 the land on which the facility is constructed.

122 (b) "Renewable energy" has the same meaning as provided in  
123 s. 366.91(2)(d).

124 (c) "Renewable energy generating facility" or "facility"  
125 means a facility of less than 75 megawatt gross capacity which  
126 generates renewable energy, emits zero greenhouse gases at the  
127 point of generation, is constructed and operated by a provider  
128 as part of a Sustainable Community Demonstration Project  
129 certified under s. 288.036, and is part of the electric utility

COMMITTEE/SUBCOMMITTEE AMENDMENT

Bill No. HB 1391 (2012)

Amendment No.

130 grid for this state. The term includes associated transmission  
131 and distribution systems.

132 (2) To demonstrate the feasibility and viability of  
133 renewable energy generating facilities and integrated smart grid  
134 infrastructure and the economic benefits for this state, and as  
135 an investment in renewable energy, the commission may approve  
136 all reasonable and prudent costs incurred by a provider under  
137 the environmental cost-recovery clause in s. 366.8255 for  
138 renewable energy generating facilities and integrated smart grid  
139 infrastructure, constructed and operated as part of a  
140 Sustainable Community Demonstration Project certified under s.  
141 288.036.

142 (a) When determining whether to approve the recovery of  
143 costs, the commission shall consider, among other factors, the  
144 projected long-term stabilization of energy costs and the  
145 legislative findings and intent in ss. 366.91(1) and 366.92(1),  
146 including, but not limited to:

- 147 1. Promoting this state's leadership among competitor  
148 states in the development of renewable energy resources;  
149 2. Diversifying the fuel mix;  
150 3. Reducing the growing dependence on fuel sources which  
151 results in an outflow of this state's capital;  
152 4. Encouraging new investments in innovation and job  
153 creation;  
154 5. Protecting the economic viability of renewable energy  
155 resources in this state; and  
156 6. Minimizing the volatility of fuel costs.

Amendment No.

157        (b) For purposes of this section, costs are reasonable and  
158 prudent if the provider has used reasonable and customary  
159 industry practices in the design, procurement, and construction  
160 of the facility and has integrated smart grid infrastructure in  
161 a cost-effective manner appropriate to the location of the  
162 facility.

163        (c) A provider must initiate proceedings with the  
164 commission no later than January 1, 2013.

165        (d) As part of the proceedings, each provider shall report  
166 its construction costs, in-service costs, operating and  
167 maintenance costs, hourly energy production of the renewable  
168 energy electrical generating facility, and any other information  
169 deemed relevant by the commission.

170        (e) The Legislature recognizes the potential catalytic  
171 effect that a demonstration project under this act will have on  
172 economic growth, job creation, entrepreneurial innovation and  
173 energy diversification. The Legislature also recognizes the  
174 investment and knowledge necessary to position this state as a  
175 hub for renewable energy and smart technology infrastructure,  
176 products and expertise, while reducing the risk of price  
177 instability and customer rate hikes resulting from the current  
178 lack of fuel diversity. As a result, the amount of cost recovery  
179 the commission may authorize for a demonstration project under  
180 this act is limited to a maximum of 5 cents per month for an  
181 average residential customer using 1,000 kilowatt hours per  
182 month, calculated on a levelized basis over the life of a  
183 facility projected to produce cost savings in a majority of  
184 those years.

Amendment No.

185       (3) This section applies only to a facility constructed  
186 and operated as part of a Sustainable Community Demonstration  
187 Project certified under s. 288.036. However, this section does  
188 not preclude a provider that is not a part of a Sustainable  
189 Community Demonstration Project from seeking cost recovery under  
190 any other applicable provision of law.

191       (4) The commission may adopt rules as necessary to  
192 administer this section.

193       Section 4. This act shall take effect upon becoming a law.

Amendment No.

213 the proceedings; establishing a cap on the amount the commission  
214 may approve for cost recovery; providing for application;  
215 authorizing the commission to adopt rules; providing an  
216 effective date.

**Department of Agriculture and Consumer Services**  
**Energy Policy Recommendations for the Legislature's Consideration**  
**January 12, 2012**

***Infrastructure Investment:***

**Proposal 1** — Reinststate the following sales tax incentives at the recommended caps and clearly define eligible cost. Reinstatement of these tax incentives will promote the development of renewable energy infrastructure which would give Florida an advantage over other states when investors are looking to build plants.

- Renewable Energy Technologies Sales Tax Exemption- \$1 million per year;
- Renewable Energy Technologies Investment Tax Credit - Increase current cap of \$6.5 million to \$10 million per year; and
- Renewable Energy Production Tax Credit - Remains the same at \$0.01 for each kilowatt-hour of energy produced and sold with a cap of \$5 million per year.

In order to avoid misinterpretations of which entities are eligible for tax credits, clarify that an “electric utility” refers to those utilities that sell electricity on a retail basis.

***Reporting Requirements:***

**Proposal 2** — Require the Department of Agriculture and Consumer Services (DACCS) to develop a comprehensive statewide forest inventory analysis identifying where available biomass is located and ensuring forest sustainability.

**Proposal 3** — Require the utilities, who file 10-year site plans with the Public Service Commission (PSC), to report the amount of renewable energy resources produced, purchased and proposed in Florida over the 10 year planning horizon and how it will impact present and future capacity and energy needs.

***Power Plant (over 75 MW) Need Determination Process:***

**Proposal 4** —Require the PSC to take into account the need to diversify Florida’s energy generation fuel supply during a Need Determination proceeding. By placing value on fuel diversity, opportunities for alternative sources of energy improve, strengthening Florida’s energy security.

***Public Interest Determination for Renewable Energy Projects:***

**Proposal 5** — Require the PSC to establish criteria for evaluating proposed renewable energy facilities or negotiated renewable energy power purchase agreements and establish reporting criteria. The requirement would create a consistent framework by which the PSC would evaluate renewable proposals and determine whether they are in the public interest, establish what information utilities must provide, and what criteria renewable projects will be evaluated against. Given this new framework, remove the current law that requires the PSC to adopt rules for a renewable portfolio standard.

Based on the criteria established in Proposal 5, require the PSC to set an investor-owned utility limit of 1 percent or 75 MW, whichever is less, of its overall generation capacity portfolio in any one year of approved renewable energy investments where those investment costs are above the

least cost alternative. Placing a cap on the overall effect on the utilities' generation portfolio will avoid unreasonable rate impacts on customers.

**Proposal 6** — Allow a utility to invest in a PSC approved financing project with renewable energy facilities in Florida. Currently this type of utility financing project is allowed with government solid waste facilities, but not with private renewable energy facilities. A joint utility and private renewable energy financing project would allow the utility to recover its expenses and a reasonable profit. This would promote investment by utilities in renewable energy facilities, when such a contract is determined by the PSC to be in the public interest.

***Energy Efficiency:***

**Proposal 7** — Require all buildings in the state building fleet, 5,000 square feet or more of conditioned space, to report their energy consumption, and requires the Department of Management Services to go to rule making in coordination with DACS to establish standard and uniform benchmarking and reporting requirements. Currently this reporting is not standardized across state agencies making the reporting incomplete and inaccurate.

**Proposal 8** —The legislature should direct DACS's Office of Energy in coordination with the Florida Energy Systems Consortium to evaluate methods to promote energy conservation and efficiency. Further, it should provide the consumer clear guidance on energy efficiency savings. The report should be completed by March 1, 2013, and presented to the Governor and the legislature. Also, the legislature should require the PSC to evaluate how the Florida Energy Efficiency and Conservation Act (FEECA) statutes provide conservation and efficiency programs that are in the public interest and without undue burden on the customer.

***Removing Barriers to Future Investments:***

**Proposal 9** —Clarify that electric vehicle charging stations are a service to the public and not the retail sale of electricity. This ensures that government entities or businesses installing and providing this service are not subject to the undue burden of regulatory fees that may be instituted by the PSC if they were to be considered retailers of electricity.

- Would direct the Florida Building Commission in coordination with DACS and the PSC to adopt rules to standardize the building and electric codes, permitting, and installation of the charging stations.
- Also would direct DACS to adopt rules to address definitions, method of sale, labeling requirements and price posting requirements to allow for consistency for consumers and the industry.
- The PSC is also instructed to conduct a study of the effects of the charging stations on energy consumption in the state as well as the effects on the grid.

**Proposal 10** — Require DACS in consultation with the University of Florida/Institute for Food and Agriculture Sciences to determine whether a plant material is exempt from the regulatory permitting process based on scientific evidence and practical experience. This would streamline the permitting process for feedstock crops for biofuels.

**Proposal 11** — Task the PSC to evaluate its current interconnection and net metering rules.

## **TAB 1 – Tax Incentives**

Reinstate the following tax incentives at the recommended caps and clearly define “eligible costs.” Reinstatement of these tax incentives will promote the development of renewable energy infrastructure which would give Florida an advantage over other states when investors are looking to build plants.

- Renewable Energy Technologies Sales Tax Exemption- \$1 million per year;
- Renewable Energy Technologies Investment Tax Credit - Increase current cap of \$6.5 million to \$10 million per year; and
- Renewable Energy Production Tax Credit - Remains the same at \$0.01 for each kilowatt-hour of energy produced and sold with a cap of \$5 million per year.

In order to avoid misinterpretations of which entities are eligible for tax credits, clarify that an “electric utility” refers to those utilities that sell electricity on a retail basis.

1 Section 1. Paragraph (hhh) is added to subsection (7) of  
 2 section 212.08, Florida Statutes, to read:

3 212.08 Sales, rental, use, consumption, distribution, and  
 4 storage tax; specified exemptions.—The sale at retail, the  
 5 rental, the use, the consumption, the distribution, and the  
 6 storage to be used or consumed in this state of the following  
 7 are hereby specifically exempt from the tax imposed by this  
 8 chapter.

9 (7) MISCELLANEOUS EXEMPTIONS.—Exemptions provided to any  
 10 entity by this chapter do not inure to any transaction that is  
 11 otherwise taxable under this chapter when payment is made by a  
 12 representative or employee of the entity by any means,  
 13 including, but not limited to, cash, check, or credit card, even  
 14 when that representative or employee is subsequently reimbursed  
 15 by the entity. In addition, exemptions provided to any entity by  
 16 this subsection do not inure to any transaction that is  
 17 otherwise taxable under this chapter unless the entity has  
 18 obtained a sales tax exemption certificate from the department  
 19 or the entity obtains or provides other documentation as  
 20 required by the department. Eligible purchases or leases made  
 21 with such a certificate must be in strict compliance with this  
 22 subsection and departmental rules, and any person who makes an  
 23 exempt purchase with a certificate that is not in strict  
 24 compliance with this subsection and the rules is liable for and  
 25 shall pay the tax. The department may adopt rules to administer  
 26 this subsection.

27 (hhh) Equipment, machinery, and other materials for  
 28 renewable energy technologies.—

TAB 1 Language

YEAR

29        1. As used in this paragraph, the term:  
 30        a. "Biodiesel" means the mono-alkyl esters of long-chain  
 31 fatty acids derived from plant or animal matter for use as a  
 32 source of energy and meeting the specifications for biodiesel  
 33 and biodiesel blends with petroleum products as adopted by rule  
 34 of the Department of Agriculture and Consumer Services.  
 35 Biodiesel may refer to biodiesel blends designated BXX, where XX  
 36 represents the volume percentage of biodiesel fuel in the blend.  
 37        b. "Ethanol" means an anhydrous denatured alcohol produced  
 38 by the conversion of carbohydrates meeting the specifications  
 39 for fuel ethanol and fuel ethanol blends with petroleum products  
 40 as adopted by rule of the Department of Agriculture and Consumer  
 41 Services. Ethanol may refer to fuel ethanol blends designated  
 42 EXX, where XX represents the volume percentage of fuel ethanol  
 43 in the blend.  
 44        c. "Renewable fuel" means a fuel produced from renewable  
 45 biomass that is used to replace or reduce the quantity of fossil  
 46 fuel present in a transportation fuel. "Biomass" means biomass  
 47 as defined in s. 366.91(2)(a).  
 48        2. The sale or use of the following in the state is exempt  
 49 from the tax imposed by this chapter:  
 50 Materials used in the distribution of biodiesel (B10-B100) and  
 51 ethanol (E10-E100) and other renewable fuels, including fueling  
 52 infrastructure, transportation, and storage, up to a limit of \$1  
 53 million in tax each state fiscal year for all taxpayers.  
 54 Gasoline fueling station pump retrofits for biodiesel (B10-  
 55 B100), ethanol (E10-E100), and other renewable fuel distribution  
 56 qualify for the exemption provided in this sub-subparagraph.

 63 | person who has received a refund on an eligible item shall  
 64 | notify the next purchaser of the item that such item is no  
 65 | longer eligible for a refund of paid taxes. This notification  
 66 | shall be provided to each subsequent purchaser on the sales  
 67 | invoice or other proof of purchase.

68 | b. To be eligible to receive the exemption provided in this  
 69 | paragraph, a purchaser shall file an application with the  
 70 | Department of Agriculture and Consumer Services. The application  
 71 | shall be developed by the Department of Agriculture and Consumer  
 72 | Services, in consultation with the Department of Revenue, and  
 73 | shall require:

74 | (I) The name and address of the person claiming the refund.

75 | (II) A specific description of the purchase for which a  
 76 | refund is sought, including, when applicable, a serial number or  
 77 | other permanent identification number.

78 | (III) The sales invoice or other proof of purchase showing  
 79 | the amount of sales tax paid, the date of purchase, and the name  
 80 | and address of the sales tax dealer from whom the property was  
 81 | purchased.

82 | (IV) A sworn statement that the information provided is  
 83 | accurate and that the requirements of this paragraph have been  
 84 | met.

85 c. Within 30 days after receipt of an application, the  
 86 Department of Agriculture and Consumer Services shall review the  
 87 application and shall notify the applicant of any deficiencies.  
 88 Upon receipt of a completed application, the Department of  
 89 Agriculture and Consumer Services shall evaluate the application  
 90 for exemption and issue a written certification that the  
 91 applicant is eligible for a refund or issue a written denial of  
 92 such certification . The Department of Agriculture and Consumer  
 93 Services shall provide the Department of Revenue with a copy of  
 94 each certification issued upon approval of an application.

95 d. Each certified applicant shall be responsible for  
 96 forwarding a certified copy of the application and copies of all  
 97 required documentation to the Department of Revenue within 6  
 98 months after certification by the Department of Agriculture and  
 99 Consumer Services.

100 e. A refund approved pursuant to this paragraph shall be  
 101 made within 30 days after formal approval by the Department of  
 102 Revenue.

103 f. The Department of Agriculture and Consumer Services may  
 104 adopt by rule the form for the application for a certificate,  
 105 requirements for the content and format of information submitted  
 106 to the Department of Agriculture and Consumer Services in  
 107 support of the application, other procedural requirements, and  
 108 criteria by which the application will be determined by rule.  
 109 The Department of Agriculture and Consumer Services may adopt  
 110 all other rules pursuant to ss. 120.536(1) and 120.54 to  
 111 administer this paragraph, including rules establishing  
 112 additional forms and procedures for claiming this exemption.

113 g. The Department of Agriculture and Consumer Services  
 114 shall be responsible for ensuring that the total amounts of the  
 115 exemptions authorized do not exceed the limits as specified in  
 116 subparagraph 2.

117 5. Approval of the exemptions under this section is on a  
 118 first-come, first-served basis, based upon the date complete  
 119 applications are received by the Department of Agriculture and  
 120 Consumer Services. Incomplete placeholder applications will not  
 121 be accepted and will not secure a place in the first-come,  
 122 first-served application line. The Department of Agriculture  
 123 and Consumer Services shall determine and publish on its website  
 124 on a regular basis the amount of sales tax funds remaining in  
 125 each fiscal year.

126 6. This paragraph expires July 1, 2016.

127 Section 2. Section 220.192, Florida Statutes, is amended  
 128 to read:

129 220.192 Renewable energy technologies investment tax  
 130 credit.—

131 (1) DEFINITIONS.—For purposes of this section, the term:

132 (a) "Biodiesel" means biodiesel as defined in ~~former~~ s.  
 133 212.08(7) (hhh) ~~(eee)~~.

134 (b) "Corporation" includes a general partnership, limited  
 135 partnership, limited liability company, unincorporated business,  
 136 or other business entity, including entities taxed as  
 137 partnerships for federal income tax purposes.

138 (c) "Eligible costs" means+ seventy-five percent of all  
 139 capital costs, operation and maintenance costs, and research and  
 140 development costs incurred between July 1, 2012 ~~2006~~, and June

TAB 1 Language

ORIGINAL

YEAR

141 30, 2016 ~~2010~~, up to a limit of \$10 ~~\$6.5~~ million per state  
 142 fiscal year for all taxpayers, in connection with an investment  
 143 in the production, storage, and distribution of biodiesel (B10-  
 144 B100), and ethanol (E10-E100), and other renewable fuel in the  
 145 state, including the costs of constructing, installing, and  
 146 equipping such technologies in the state. Gasoline fueling  
 147 station pump retrofits for biodiesel (B10-B100), and ethanol  
 148 (E10-E100), and other renewable fuel distribution qualify as an  
 149 eligible cost under this subparagraph.

150 ~~1. Seventy five percent of all capital costs, operation~~  
 151 ~~and maintenance costs, and research and development costs~~  
 152 ~~incurred between July 1, 2006, and June 30, 2010, up to a limit~~  
 153 ~~of \$3 million per state fiscal year for all taxpayers, in~~  
 154 ~~connection with an investment in hydrogen powered vehicles and~~  
 155 ~~hydrogen vehicle fueling stations in the state, including, but~~  
 156 ~~not limited to, the costs of constructing, installing, and~~  
 157 ~~equipping such technologies in the state.~~

158 ~~2. Seventy five percent of all capital costs, operation~~  
 159 ~~and maintenance costs, and research and development costs~~  
 160 ~~incurred between July 1, 2006, and June 30, 2010, up to a limit~~  
 161 ~~of \$1.5 million per state fiscal year for all taxpayers, and~~  
 162 ~~limited to a maximum of \$12,000 per fuel cell, in connection~~  
 163 ~~with an investment in commercial stationary hydrogen fuel cells~~  
 164 ~~in the state, including, but not limited to, the costs of~~  
 165 ~~constructing, installing, and equipping such technologies in the~~  
 166 ~~state.~~

167 ~~3.~~

168 (d) "Ethanol" means ethanol as defined in former s.

TAB 1 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 1 Language

ORIGINAL

YEAR

169 | 212.08(7) (hhh) ~~(eee)~~.

170 |       (e) "Renewable fuel" means a fuel produced from renewable  
171 | biomass that is used to replace or reduce the quantity of fossil  
172 | fuel present in a transportation fuel. "Biomass" means biomass  
173 | as defined in s. 366.91(2)(a). ~~"Hydrogen fuel cell" means~~  
174 | ~~hydrogen fuel cell as defined in former s. 212.08(7)(eee).~~

175 |       (f) "Taxpayer" includes a corporation as defined in  
176 | paragraph (b) or s. 220.03.

177 |       (2) TAX CREDIT.—For tax years beginning on or after  
178 | January 1, 2013 ~~2007~~, a credit against the tax imposed by this  
179 | chapter shall be granted in an amount equal to the eligible  
180 | costs. Credits may be used in tax years beginning January 1,  
181 | 2013 ~~2007~~, and ending December 31, 2016 ~~2010~~, after which the  
182 | credit shall expire. If the credit is not fully used in any one  
183 | tax year because of insufficient tax liability on the part of  
184 | the corporation, the unused amount may be carried forward and  
185 | used in tax years beginning January 1, 2013 ~~2007~~, and ending  
186 | December 31, 2018 ~~2012~~, after which the credit carryover expires  
187 | and may not be used. A taxpayer that files a consolidated return  
188 | in this state as a member of an affiliated group under s.  
189 | 220.131(1) may be allowed the credit on a consolidated return  
190 | basis up to the amount of tax imposed upon the consolidated  
191 | group. Any eligible cost for which a credit is claimed and which  
192 | is deducted or otherwise reduces federal taxable income shall be  
193 | added back in computing adjusted federal income under s. 220.13.

194 |       (3) CORPORATE APPLICATION PROCESS.—Any corporation wishing  
195 | to obtain tax credits available under this section must submit  
196 | to the Department of Agriculture and Consumer Services an

TAB 1 Language

ORIGINAL

YEAR

197 application for tax credit that includes a complete description  
 198 of all eligible costs for which the corporation is seeking a  
 199 credit and a description of the total amount of credits sought.  
 200 The Department of Agriculture and Consumer Services shall make a  
 201 determination on the eligibility of the applicant for the  
 202 credits sought and certify the determination to the applicant  
 203 and the Department of Revenue. The corporation must attach the  
 204 Department of Agriculture and Consumer Services' certification  
 205 to the tax return on which the credit is claimed. The Department  
 206 of Agriculture and Consumer Services is responsible for ensuring  
 207 that the corporate income tax credits granted in each fiscal  
 208 year do not exceed the limits provided for in this section. The  
 209 Department of Agriculture and Consumer Services may adopt the  
 210 necessary rules and forms for the application process.

211 (4) TAXPAYER APPLICATION PROCESS.—To claim a credit under  
 212 this section, each taxpayer must apply to the Department of  
 213 Agriculture and Consumer Services for an allocation of each type  
 214 of annual credit by the date established by the Department of  
 215 Agriculture and Consumer Services. The application form adopted  
 216 by rule of the Department of Agriculture and Consumer Services  
 217 must include an affidavit from each taxpayer certifying that all  
 218 information contained in the application, including all records  
 219 of eligible costs claimed as the basis for the tax credit, are  
 220 true and correct. Approval of the credits under this section is  
 221 on a first-come, first-served basis, based upon the date  
 222 complete applications are received by the Department of  
 223 Agriculture and Consumer Services. A taxpayer must submit only  
 224 one complete application based upon eligible costs incurred

TAB 1 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 1 Language

ORIGINAL

YEAR

225 within a particular state fiscal year. Incomplete placeholder  
 226 applications will not be accepted and will not secure a place in  
 227 the first-come, first-served application line. If a taxpayer  
 228 does not receive a tax credit allocation due to the exhaustion  
 229 of the annual tax credit authorizations, then such taxpayer may  
 230 reapply in the following year for those eligible costs and will  
 231 have priority over other applicants for the allocation of  
 232 credits.

233 (5) ADMINISTRATION; AUDIT AUTHORITY; RECAPTURE OF  
 234 CREDITS.—

235 (a) In addition to its existing audit and investigation  
 236 authority, the Department of Revenue may perform any additional  
 237 financial and technical audits and investigations, including  
 238 examining the accounts, books, and records of the tax credit  
 239 applicant, which are necessary to verify the eligible costs  
 240 included in the tax credit return and to ensure compliance with  
 241 this section. The Department of Agriculture and Consumer  
 242 Services shall provide technical assistance when requested by  
 243 the Department of Revenue on any technical audits or  
 244 examinations performed pursuant to this section.

245 (b) It is grounds for forfeiture of previously claimed and  
 246 received tax credits if the Department of Revenue determines, as  
 247 a result of an audit or examination or from information received  
 248 from the Department of Agriculture and Consumer Services, that a  
 249 taxpayer received tax credits pursuant to this section to which  
 250 the taxpayer was not entitled. The taxpayer is responsible for  
 251 returning forfeited tax credits to the Department of Revenue,  
 252 and such funds shall be paid into the General Revenue Fund of

YEAR

253 | the state.

254 |       (c) The Department of Agriculture and Consumer Services  
 255 | may revoke or modify any written decision granting eligibility  
 256 | for tax credits under this section if it is discovered that the  
 257 | tax credit applicant submitted any false statement,  
 258 | representation, or certification in any application, record,  
 259 | report, plan, or other document filed in an attempt to receive  
 260 | tax credits under this section. The Department of Agriculture  
 261 | and Consumer Services shall immediately notify the Department of  
 262 | Revenue of any revoked or modified orders affecting previously  
 263 | granted tax credits. Additionally, the taxpayer must notify the  
 264 | Department of Revenue of any change in its tax credit claimed.

265 |       (d) The taxpayer shall file with the Department of Revenue  
 266 | an amended return or such other report as the Department of  
 267 | Revenue prescribes by rule and shall pay any required tax and  
 268 | interest within 60 days after the taxpayer receives notification  
 269 | from the Department of Agriculture and Consumer Services that  
 270 | previously approved tax credits have been revoked or modified.  
 271 | If the revocation or modification order is contested, the  
 272 | taxpayer shall file an amended return or other report as  
 273 | provided in this paragraph within 60 days after a final order is  
 274 | issued after proceedings.

275 |       (e) A notice of deficiency may be issued by the Department  
 276 | of Revenue at any time within 3 years after the taxpayer  
 277 | receives formal notification from the Department of Agriculture  
 278 | and Consumer Services that previously approved tax credits have  
 279 | been revoked or modified. If a taxpayer fails to notify the  
 280 | Department of Revenue of any changes to its tax credit claimed,

YEAR

281 | a notice of deficiency may be issued at any time.  
 282 |       (6) TRANSFERABILITY OF CREDIT.—  
 283 |       (a) For tax years beginning on or after January 1, 2014  
 284 | ~~2009~~, any corporation or subsequent transferee allowed a tax  
 285 | credit under this section may transfer the credit, in whole or  
 286 | in part, to any taxpayer by written agreement without  
 287 | transferring any ownership interest in the property generating  
 288 | the credit or any interest in the entity owning such property.  
 289 | The transferee is entitled to apply the credits against the tax  
 290 | with the same effect as if the transferee had incurred the  
 291 | eligible costs.  
 292 |       (b) To perfect the transfer, the transferor shall provide  
 293 | the Department of Revenue with a written transfer statement  
 294 | notifying the Department of Revenue of the transferor's intent  
 295 | to transfer the tax credits to the transferee; the date the  
 296 | transfer is effective; the transferee's name, address, and  
 297 | federal taxpayer identification number; the tax period; and the  
 298 | amount of tax credits to be transferred. The Department of  
 299 | Revenue shall, upon receipt of a transfer statement conforming  
 300 | to the requirements of this section, provide the transferee with  
 301 | a certificate reflecting the tax credit amounts transferred. A  
 302 | copy of the certificate must be attached to each tax return for  
 303 | which the transferee seeks to apply such tax credits.  
 304 |       (c) A tax credit authorized under this section that is  
 305 | held by a corporation and not transferred under this subsection  
 306 | shall be passed through to the taxpayers designated as partners,  
 307 | members, or owners, respectively, in the manner agreed to by  
 308 | such persons regardless of whether such partners, members, or

YEAR

309 owners are allocated or allowed any portion of the federal  
 310 energy tax credit for the eligible costs. A corporation that  
 311 passes the credit through to a partner, member, or owner must  
 312 comply with the notification requirements described in paragraph  
 313 (b). The partner, member, or owner must attach a copy of the  
 314 certificate to each tax return on which the partner, member, or  
 315 owner claims any portion of the credit.

316 (7) RULES.—The Department of Revenue in coordination with  
 317 the Department of Agriculture and Consumer Services shall have  
 318 the authority to adopt rules pursuant to ss. 120.536(1) and  
 319 120.54 to administer this section, including rules relating to:

320 (a) The forms required to claim a tax credit under this  
 321 section, the requirements and basis for establishing an  
 322 entitlement to a credit, and the examination and audit  
 323 procedures required to administer this section.

324 (b) The implementation and administration of the  
 325 provisions allowing a transfer of a tax credit, including rules  
 326 prescribing forms, reporting requirements, and specific  
 327 procedures, guidelines, and requirements necessary to transfer a  
 328 tax credit.

329 (c) Each applicant is eligible to receive up to \$1 million  
 330 in tax credits.

331 (8) PUBLICATION.—The Department of Agriculture and  
 332 Consumer Services shall determine and publish on its website on  
 333 a regular basis the amount of available tax credits remaining in  
 334 each fiscal year.

335 Section 3. Section 220.193, Florida Statutes, is amended  
 336 to read:

TAB 1 Language

ORIGINAL

YEAR

337 220.193 Florida renewable energy production credit.-

338 (1) The purpose of this section is to encourage the  
 339 development and expansion of facilities that produce renewable  
 340 energy in Florida.

341 (2) As used in this section, the term:

342 (a) "Commission" shall mean the Public Service Commission.

343 (b) "Department" shall mean the Department of Revenue.

344 (c) "Expanded facility" shall mean a Florida renewable  
 345 energy facility that increases its electrical production and  
 346 sale by more than 5 percent above the facility's electrical  
 347 production and sale during the 2011 ~~2005~~ calendar year.

348 (d) "Florida renewable energy facility" shall mean a  
 349 facility in the state that produces electricity for sale from  
 350 renewable energy, as defined in s. 377.803.

351 (e) "New facility" shall mean a Florida renewable energy  
 352 facility that is operationally placed in service after May 1,  
 353 2012 ~~2006~~.

354 (f) "Sale" or "sold" includes the use of electricity by  
 355 the producer of such electricity which decreases the amount of  
 356 electricity that the producer would otherwise have to purchase.

357 (g) "Taxpayer" includes a general partnership, limited  
 358 partnership, limited liability company, trust, or other  
 359 artificial entity in which a corporation, as defined in s.  
 360 220.03(1)(e), owns an interest and is taxed as a partnership or  
 361 is disregarded as a separate entity from the corporation under  
 362 this chapter.

363 (3) An annual credit against the tax imposed by this  
 364 section shall be allowed to a taxpayer, based on the taxpayer's

TAB 1 Language

ORIGINAL

YEAR

365 production and sale of electricity from a new or expanded  
 366 Florida renewable energy facility. For a new facility, the  
 367 credit shall be based on the taxpayer's sale of the facility's  
 368 entire electrical production. For an expanded facility, the  
 369 credit shall be based on the increases in the facility's  
 370 electrical production that are achieved after May 1, 2012 ~~2006~~.

371 (a) The credit shall be \$0.01 for each kilowatt-hour of  
 372 electricity produced and sold by the taxpayer to an unrelated  
 373 party during a given tax year.

374 (b) The credit may be claimed for electricity produced and  
 375 sold on or after January 1, 2013 ~~2007~~. Beginning in 2014 ~~2008~~  
 376 and continuing until 2017 ~~2011~~, each taxpayer claiming a credit  
 377 under this section must first apply to the department by  
 378 February 1 of each year for an allocation of available credit.  
 379 The department, in consultation with the commission, shall  
 380 develop an application form. The application form shall, at a  
 381 minimum, require a sworn affidavit from each taxpayer certifying  
 382 the increase in production and sales that form the basis of the  
 383 application and certifying that all information contained in the  
 384 application is true and correct.

385 (c) If the amount of credits applied for each year exceeds  
 386 \$5 million, the department shall award to each applicant a  
 387 prorated amount based on each applicant's increased production  
 388 and sales and the increased production and sales of all  
 389 applicants.

390 (d) If the credit granted pursuant to this section is not  
 391 fully used in one year because of insufficient tax liability on  
 392 the part of the taxpayer, the unused amount may be carried

TAB 1 Language

ORIGINAL

YEAR

393 forward for a period not to exceed 5 years. The carryover credit  
 394 may be used in a subsequent year when the tax imposed by this  
 395 chapter for such year exceeds the credit for such year, after  
 396 applying the other credits and unused credit carryovers in the  
 397 order provided in s. 220.02(8).

398 (e) A taxpayer that files a consolidated return in this  
 399 state as a member of an affiliated group under s. 220.131(1) may  
 400 be allowed the credit on a consolidated return basis up to the  
 401 amount of tax imposed upon the consolidated group.

402 (f)1. Tax credits that may be available under this section  
 403 to an entity eligible under this section may be transferred  
 404 after a merger or acquisition to the surviving or acquiring  
 405 entity and used in the same manner with the same limitations.

406 2. The entity or its surviving or acquiring entity as  
 407 described in subparagraph 1. may transfer any unused credit in  
 408 whole or in units of no less than 25 percent of the remaining  
 409 credit. The entity acquiring such credit may use it in the same  
 410 manner and with the same limitations under this section. Such  
 411 transferred credits may not be transferred again although they  
 412 may succeed to a surviving or acquiring entity subject to the  
 413 same conditions and limitations as described in this section.

414 3. In the event the credit provided for under this section  
 415 is reduced as a result of an examination or audit by the  
 416 department, such tax deficiency shall be recovered from the  
 417 first entity or the surviving or acquiring entity to have  
 418 claimed such credit up to the amount of credit taken. Any  
 419 subsequent deficiencies shall be assessed against any entity  
 420 acquiring and claiming such credit, or in the case of multiple

TAB 1 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 1 Language

ORIGINAL

YEAR

421 | succeeding entities in the order of credit succession.

422 |       (g) Notwithstanding any other provision of this section,  
 423 | credits for the production and sale of electricity from a new or  
 424 | expanded Florida renewable energy facility may be earned between  
 425 | January 1, 2013 ~~2007~~, and June 30, 2016 ~~2010~~. The combined total  
 426 | amount of tax credits which may be granted for all taxpayers  
 427 | under this section is limited to \$5 million per state fiscal  
 428 | year.

429 |       (h) A taxpayer claiming a credit under this section shall  
 430 | be required to add back to net income that portion of its  
 431 | business deductions claimed on its federal return paid or  
 432 | incurred for the taxable year which is equal to the amount of  
 433 | the credit allowable for the taxable year under this section.

434 |       (i) A taxpayer claiming credit under this section may not  
 435 | claim a credit under s. 220.192. A taxpayer claiming credit  
 436 | under s. 220.192 may not claim a credit under this section.

437 |       (j) When an entity treated as a partnership or a  
 438 | disregarded entity under this chapter produces and sells  
 439 | electricity from a new or expanded renewable energy facility,  
 440 | the credit earned by such entity shall pass through in the same  
 441 | manner as items of income and expense pass through for federal  
 442 | income tax purposes. When an entity applies for the credit and  
 443 | the entity has received the credit by a pass-through, the  
 444 | application must identify the taxpayer that passed the credit  
 445 | through, all taxpayers that received the credit, and the  
 446 | percentage of the credit that passes through to each recipient  
 447 | and must provide other information that the department requires.

448 |       (k) A taxpayer's use of the credit granted pursuant to

TAB 1 Language

ORIGINAL

YEAR

449 | this section does not reduce the amount of any credit available  
 450 | to such taxpayer under s. 220.186.

451 |       (4) The department may adopt rules to implement and  
 452 | administer this section, including rules prescribing forms, the  
 453 | documentation needed to substantiate a claim for the tax credit,  
 454 | ~~and~~ the specific procedures and guidelines for claiming the  
 455 | credit, and each applicant is eligible to receive up to \$500,000  
 456 | in tax credits.

457 |       (5) This section shall take effect upon becoming law and  
 458 | shall apply to tax years beginning on and after January 1, 2013  
 459 | ~~2007~~.

460 |       Section 4. Section 288.106, Florida Statutes, is amended  
 461 | to read:

462 |       288.106 Tax refund program for qualified target industry  
 463 | businesses.—

464 |       (1) LEGISLATIVE FINDINGS AND DECLARATIONS.—The Legislature  
 465 | finds that retaining and expanding existing businesses in the  
 466 | state, encouraging the creation of new businesses in the state,  
 467 | attracting new businesses from outside the state, and generally  
 468 | providing conditions favorable for the growth of target  
 469 | industries creates high-quality, high-wage employment  
 470 | opportunities for residents of the state and strengthens the  
 471 | state's economic foundation. The Legislature also finds that  
 472 | incentives narrowly focused in application and scope tend to be  
 473 | more effective in achieving the state's economic development  
 474 | goals. The Legislature further finds that higher-wage jobs  
 475 | reduce the state's share of hidden costs, such as public  
 476 | assistance and subsidized health care associated with low-wage

TAB 1 Language

ORIGINAL

YEAR

477 | jobs. Therefore, the Legislature declares that it is the policy  
 478 | of the state to encourage the growth of higher-wage jobs and a  
 479 | diverse economic base by providing state tax refunds to  
 480 | qualified target industry businesses that originate or expand in  
 481 | the state or that relocate to the state.

482 | (2) DEFINITIONS.—As used in this section:

483 | (a) "Account" means the Economic Development Incentives  
 484 | Account within the Economic Development Trust Fund established  
 485 | under s. 288.095.

486 | (b) "Authorized local economic development agency" means a  
 487 | public or private entity, including an entity defined in s.  
 488 | 288.075, authorized by a county or municipality to promote the  
 489 | general business or industrial interests of that county or  
 490 | municipality.

491 | (c) "Average private sector wage in the area" means the  
 492 | statewide private sector average wage or the average of all  
 493 | private sector wages and salaries in the county or in the  
 494 | standard metropolitan area in which the business is located.

495 | (d) "Business" means an employing unit, as defined in s.  
 496 | 443.036, that is registered for unemployment compensation  
 497 | purposes with the state agency providing unemployment tax  
 498 | collection services under an interagency agreement pursuant to  
 499 | s. 443.1316, or a subcategory or division of an employing unit  
 500 | that is accepted by the state agency providing unemployment tax  
 501 | collection services as a reporting unit.

502 | (e) "Corporate headquarters business" means an  
 503 | international, national, or regional headquarters office of a  
 504 | multinational or multistate business enterprise or national

TAB 1 Language

ORIGINAL

YEAR

505 trade association, whether separate from or connected with other  
506 facilities used by such business.

507 (f) "Enterprise zone" means an area designated as an  
508 enterprise zone pursuant to s. 290.0065.

509 (g) "Expansion of an existing business" means the  
510 expansion of an existing Florida business by or through  
511 additions to real and personal property, resulting in a net  
512 increase in employment of not less than 10 percent at such  
513 business.

514 (h) "Fiscal year" means the fiscal year of the state.

515 (i) "Jobs" means full-time equivalent positions,  
516 including, but not limited to, positions obtained from a  
517 temporary employment agency or employee leasing company or  
518 through a union agreement or coemployment under a professional  
519 employer organization agreement, that result directly from a  
520 project in this state. The term does not include temporary  
521 construction jobs involved with the construction of facilities  
522 for the project or any jobs previously included in any  
523 application for tax refunds under s. 288.1045 or this section.

524 (j) "Local financial support" means funding from local  
525 sources, public or private, that is paid to the Economic  
526 Development Trust Fund and that is equal to 20 percent of the  
527 annual tax refund for a qualified target industry business. A  
528 qualified target industry business may not provide, directly or  
529 indirectly, more than 5 percent of such funding in any fiscal  
530 year. The sources of such funding may not include, directly or  
531 indirectly, state funds appropriated from the General Revenue  
532 Fund or any state trust fund, excluding tax revenues shared with

TAB 1 Language

ORIGINAL

YEAR

533 local governments pursuant to law.

534 (k) "Local financial support exemption option" means the  
 535 option to exercise an exemption from the local financial support  
 536 requirement available to any applicant whose project is located  
 537 in a brownfield area, a rural city, or a rural community. Any  
 538 applicant that exercises this option is not eligible for more  
 539 than 80 percent of the total tax refunds allowed such applicant  
 540 under this section.

541 (l) "New business" means a business that applies for a tax  
 542 refund under this section before beginning operations in this  
 543 state and that is a legal entity separate from any other  
 544 commercial or industrial operations owned by the same business.

545 (m) "Project" means the creation of a new business or  
 546 expansion of an existing business.

547 (n) "Qualified target industry business" means a target  
 548 industry business approved by the department to be eligible for  
 549 tax refunds under this section.

550 (o) "Rural city" means a city having a population of  
 551 10,000 or fewer, or a city having a population of greater than  
 552 10,000 but fewer than 20,000 that has been determined by the  
 553 department to have economic characteristics such as, but not  
 554 limited to, a significant percentage of residents on public  
 555 assistance, a significant percentage of residents with income  
 556 below the poverty level, or a significant percentage of the  
 557 city's employment base in agriculture-related industries.

558 (p) "Rural community" means:

- 559 1. A county having a population of 75,000 or fewer.
- 560 2. A county having a population of 125,000 or fewer that

TAB 1 Language

ORIGINAL

YEAR

561 is contiguous to a county having a population of 75,000 or  
562 fewer.

563 3. A municipality within a county described in  
564 subparagraph 1. or subparagraph 2.

565

566 For purposes of this paragraph, population shall be determined  
567 in accordance with the most recent official estimate pursuant to  
568 s. 186.901.

569 (q) "Target industry business" means a corporate  
570 headquarters business or any business that is engaged in one of  
571 the target industries identified pursuant to the following  
572 criteria developed by the department in consultation with  
573 Enterprise Florida, Inc.:

574 1. Future growth.—Industry forecasts should indicate  
575 strong expectation for future growth in both employment and  
576 output, according to the most recent available data. Special  
577 consideration should be given to businesses that export goods  
578 to, or provide services in, international markets and businesses  
579 that replace domestic and international imports of goods or  
580 services.

581 2. Stability.—The industry should not be subject to  
582 periodic layoffs, whether due to seasonality or sensitivity to  
583 volatile economic variables such as weather. The industry should  
584 also be relatively resistant to recession, so that the demand  
585 for products of this industry is not typically subject to  
586 decline during an economic downturn.

587 3. High wage.—The industry should pay relatively high  
588 wages compared to statewide or area averages.

TAB 1 Language

ORIGINAL

YEAR

589 4. Market and resource independent.—The location of  
 590 industry businesses should not be dependent on Florida markets  
 591 or resources as indicated by industry analysis, except for  
 592 businesses in the renewable energy industry.

593 5. Industrial base diversification and strengthening.—The  
 594 industry should contribute toward expanding or diversifying the  
 595 state's or area's economic base, as indicated by analysis of  
 596 employment and output shares compared to national and regional  
 597 trends. Special consideration should be given to industries that  
 598 strengthen regional economies by adding value to basic products  
 599 or building regional industrial clusters as indicated by  
 600 industry analysis. Special consideration should also be given to  
 601 the development of strong industrial clusters that include  
 602 defense and homeland security businesses.

603 6. Positive economic impact.—The industry is expected to  
 604 have strong positive economic impacts on or benefits to the  
 605 state or regional economies. Special consideration should be  
 606 given to industries that facilitate the development of the state  
 607 as a hub for domestic and global trade and logistics.

608  
 609 The term does not include any business engaged in retail  
 610 industry activities; any electrical utility company as defined  
 611 in s.366.02(2); any phosphate or other solid minerals severance,  
 612 mining, or processing operation; any oil or gas exploration or  
 613 production operation; or any business subject to regulation by  
 614 the Division of Hotels and Restaurants of the Department of  
 615 Business and Professional Regulation. Any business within NAICS  
 616 code 5611 or 5614, office administrative services and business

TAB 1 Language

ORIGINAL

YEAR

617 support services, respectively, may be considered a target  
 618 industry business only after the local governing body and  
 619 Enterprise Florida, Inc., make a determination that the  
 620 community where the business may locate has conditions affecting  
 621 the fiscal and economic viability of the local community or  
 622 area, including but not limited to, factors such as low per  
 623 capita income, high unemployment, high underemployment, and a  
 624 lack of year-round stable employment opportunities, and such  
 625 conditions may be improved by the location of such a business to  
 626 the community. By January 1 of every 3rd year, beginning January  
 627 1, 2011, the department, in consultation with Enterprise  
 628 Florida, Inc., economic development organizations, the State  
 629 University System, local governments, employee and employer  
 630 organizations, market analysts, and economists, shall review  
 631 and, as appropriate, revise the list of such target industries  
 632 and submit the list to the Governor, the President of the  
 633 Senate, and the Speaker of the House of Representatives.

634 (r) "Taxable year" means taxable year as defined in s.  
 635 220.03(1)(y).

636 (3) TAX REFUND; ELIGIBLE AMOUNTS.—

637 (a) There shall be allowed, from the account, a refund to  
 638 a qualified target industry business for the amount of eligible  
 639 taxes certified by the department that were paid by the  
 640 business. The total amount of refunds for all fiscal years for  
 641 each qualified target industry business must be determined  
 642 pursuant to subsection (4). The annual amount of a refund to a  
 643 qualified target industry business must be determined pursuant  
 644 to subsection (6).

TAB 1 Language

ORIGINAL

YEAR

645 (b)1. Upon approval by the department, a qualified target  
 646 industry business shall be allowed tax refund payments equal to  
 647 \$3,000 multiplied by the number of jobs specified in the tax  
 648 refund agreement under subparagraph (5)(a)1., or equal to \$6,000  
 649 multiplied by the number of jobs if the project is located in a  
 650 rural community or an enterprise zone.

651 2. A qualified target industry business shall be allowed  
 652 additional tax refund payments equal to \$1,000 multiplied by the  
 653 number of jobs specified in the tax refund agreement under  
 654 subparagraph (5)(a)1. if such jobs pay an annual average wage of  
 655 at least 150 percent of the average private sector wage in the  
 656 area, or equal to \$2,000 multiplied by the number of jobs if  
 657 such jobs pay an annual average wage of at least 200 percent of  
 658 the average private sector wage in the area.

659 3. A qualified target industry business shall be allowed  
 660 tax refund payments in addition to the other payments authorized  
 661 in this paragraph equal to \$1,000 multiplied by the number of  
 662 jobs specified in the tax refund agreement under subparagraph  
 663 (5)(a)1. if the local financial support is equal to that of the  
 664 state's incentive award under subparagraph 1.

665 4. In addition to the other tax refund payments authorized  
 666 in this paragraph, a qualified target industry business shall be  
 667 allowed a tax refund payment equal to \$2,000 multiplied by the  
 668 number of jobs specified in the tax refund agreement under  
 669 subparagraph (5)(a)1. if the business:

670 a. Falls within one of the high-impact sectors designated  
 671 under s. 288.108; or

672 b. Increases exports of its goods through a seaport or

TAB 1 Language

ORIGINAL

YEAR

673 | airport in the state by at least 10 percent in value or tonnage  
 674 | in each of the years that the business receives a tax refund  
 675 | under this section. For purposes of this sub-subparagraph,  
 676 | seaports in the state are limited to the ports of Jacksonville,  
 677 | Tampa, Port Everglades, Miami, Port Canaveral, Ft. Pierce, Palm  
 678 | Beach, Port Manatee, Port St. Joe, Panama City, St. Petersburg,  
 679 | Pensacola, Fernandina, and Key West.

680 |       (c) A qualified target industry business may not receive  
 681 | refund payments of more than 25 percent of the total tax refunds  
 682 | specified in the tax refund agreement under subparagraph  
 683 | (5)(a)1. in any fiscal year. Further, a qualified target  
 684 | industry business may not receive more than \$1.5 million in  
 685 | refunds under this section in any single fiscal year, or more  
 686 | than \$2.5 million in any single fiscal year if the project is  
 687 | located in an enterprise zone. A qualified target industry  
 688 | business may not receive more than \$7 million in refund payments  
 689 | under this section in all fiscal years, or more than \$7.5  
 690 | million if the project is located in an enterprise zone.

691 |       (d) After entering into a tax refund agreement under  
 692 | subsection (5), a qualified target industry business may:

693 |       1. Receive refunds from the account for the following  
 694 | taxes due and paid by that business beginning with the first  
 695 | taxable year of the business that begins after entering into the  
 696 | agreement:

697 |           a. Corporate income taxes under chapter 220.

698 |           b. Insurance premium tax under s. 624.509.

699 |       2. Receive refunds from the account for the following  
 700 | taxes due and paid by that business after entering into the

TAB 1 Language

ORIGINAL

YEAR

701 agreement:

702 a. Taxes on sales, use, and other transactions under

703 chapter 212.

704 b. Intangible personal property taxes under chapter 199.

705 c. Excise taxes on documents under chapter 201.

706 d. Ad valorem taxes paid, as defined in s. 220.03(1).

707 e. State communications services taxes administered under

708 chapter 202. This provision does not apply to the gross receipts

709 tax imposed under chapter 203 and administered under chapter 202

710 or the local communications services tax authorized under s.

711 202.19.

712 (e) However, a qualified target industry business may not

713 receive a refund under this section for any amount of credit,

714 refund, or exemption previously granted to that business for any

715 of the taxes listed in paragraph (d). If a refund for such taxes

716 is provided by the department, which taxes are subsequently

717 adjusted by the application of any credit, refund, or exemption

718 granted to the qualified target industry business other than as

719 provided in this section, the business shall reimburse the

720 account for the amount of that credit, refund, or exemption. A

721 qualified target industry business shall notify and tender

722 payment to the department within 20 days after receiving any

723 credit, refund, or exemption other than one provided in this

724 section.

725 (f) Refunds made available under this section may not be

726 expended in connection with the relocation of a business from

727 one community to another community in the state unless the

728 department determines that, without such relocation, the

TAB 1 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 1 Language

ORIGINAL

YEAR

729 | business will move outside the state or determines that the  
 730 | business has a compelling economic rationale for relocation and  
 731 | that the relocation will create additional jobs.

732 |         (g) A qualified target industry business that fraudulently  
 733 | claims a refund under this section:

734 |             1. Is liable for repayment of the amount of the refund to  
 735 | the account, plus a mandatory penalty in the amount of 200  
 736 | percent of the tax refund which shall be deposited into the  
 737 | General Revenue Fund.

738 |             2. Commits a felony of the third degree, punishable as  
 739 | provided in s. 775.082, s. 775.083, or s. 775.084.

## **TAB 1 – Tax Incentives**

Reinstate the following tax incentives at the recommended caps and clearly define “eligible costs.” Reinstatement of these tax incentives will promote the development of renewable energy infrastructure which would give Florida an advantage over other states when investors are looking to build plants.

- Renewable Energy Technologies Sales Tax Exemption- \$1 million per year;
- Renewable Energy Technologies Investment Tax Credit - Increase current cap of \$6.5 million to \$10 million per year; and
- Renewable Energy Production Tax Credit - Remains the same at \$0.01 for each kilowatt-hour of energy produced and sold with a cap of \$5 million per year.

In order to avoid misinterpretations of which entities are eligible for tax credits, clarify that an “electric utility” refers to those utilities that sell electricity on a retail basis.

## **TAB 2 – Forest Inventory Analysis**

Require the Department of Agriculture and Consumer Services (DACS) to develop a comprehensive statewide forest inventory analysis identifying where available biomass is located and ensuring forest sustainability.

TAB 2 Language

ORIGINAL

YEAR

1           Section 1. The Department of Agriculture and Consumer  
 2 Services shall conduct a comprehensive statewide forest  
 3 inventory analysis and study, utilizing Geographic Information  
 4 System, to identify where available biomass is located,  
 5 determine the available biomass resources, and ensure forest  
 6 sustainability within the state. The Department shall submit the  
 7 results of the study to the President of the Senate, the Speaker  
 8 of the House of Representatives, and the Executive Office of the  
 9 Governor no later than July 1, 2013.

TAB 2 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

### **TAB 3 – 10-Year Site Plans**

Require the utilities, who file 10-year site plans with the Public Service Commission (PSC), to report the amount of renewable energy resources produced, purchased and proposed in Florida over the 10 year planning horizon and how it will impact present and future capacity and energy needs.

TAB 3 Language

ORIGINAL

YEAR

1 Section 1. Section 186.801, Florida Statutes, is amended  
 2 to read:

3 186.801 Ten-year site plans.—

4 (1) Beginning January 1, 1974, each electric utility shall  
 5 submit to the Public Service Commission a 10-year site plan  
 6 which shall estimate its power-generating needs and the general  
 7 location of its proposed power plant sites. The 10-year plan  
 8 shall be reviewed and submitted not less frequently than every 2  
 9 years.

10 (2) Within 9 months after the receipt of the proposed  
 11 plan, the commission shall make a preliminary study of such plan  
 12 and classify it as "suitable" or "unsuitable." The commission  
 13 may suggest alternatives to the plan. All findings of the  
 14 commission shall be made available to the Department of  
 15 Environmental Protection for its consideration at any subsequent  
 16 electrical power plant site certification proceedings. It is  
 17 recognized that 10-year site plans submitted by an electric  
 18 utility are tentative information for planning purposes only and  
 19 may be amended at any time at the discretion of the utility upon  
 20 written notification to the commission. A complete application  
 21 for certification of an electrical power plant site under  
 22 chapter 403, when such site is not designated in the current 10-  
 23 year site plan of the applicant, shall constitute an amendment  
 24 to the 10-year site plan. In its preliminary study of each 10-  
 25 year site plan, the commission shall consider such plan as a  
 26 planning document and shall review:

27 (a) The need, including the need as determined by the  
 28 commission, for electrical power in the area to be served.

TAB 3 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 3 Language

ORIGINAL

YEAR

- 29 (b) The effect on fuel diversity within the state.
- 30 (c) The anticipated environmental impact of each proposed  
31 electrical power plant site.
- 32 (d) Possible alternatives to the proposed plan.
- 33 (e) The views of appropriate local, state, and federal  
34 agencies, including the views of the appropriate water  
35 management district as to the availability of water and its  
36 recommendation as to the use by the proposed plant of salt water  
37 or fresh water for cooling purposes.
- 38 (f) The extent to which the plan is consistent with the  
39 state comprehensive plan.
- 40 (g) The plan with respect to the information of the state  
41 on energy availability and consumption.
- 42 (h) The amount of renewable energy resources the provider  
43 produces or purchases.
- 44 (i) The amount of renewable energy resources the provider  
45 plans to produce or purchase over the 10-year planning horizon  
46 and the means by which such production or purchases will be  
47 achieved.
- 48 (j) A statement indicating how the production and purchase  
49 of renewable energy resources impact the providers present and  
50 future capacity and energy needs.
- 51 (3) In order to enable it to carry out its duties under  
52 this section, the commission may, after hearing, establish a  
53 study fee which shall not exceed \$1,000 for each proposed plan  
54 studied.
- 55 (4) The commission may adopt rules governing the method of  
56 submitting, processing, and studying the 10-year plans as

TAB 3 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 3 Language

ORIGINAL

YEAR

57 | required by this section.

## **TAB 4 – Need Determination Proceedings**

Require the PSC to take into account the need to diversify Florida's energy generation fuel supply during a Need Determination proceeding. By placing value on fuel diversity, opportunities for alternative sources of energy improve, strengthening Florida's energy security.

TAB 4 Language

ORIGINAL

YEAR

1 Section 1. Section 403.519, Florida Statutes, is amended  
2 to read:

3 403.519 Exclusive forum for determination of need.—

4 (1) On request by an applicant or on its own motion, the  
5 commission shall begin a proceeding to determine the need for an  
6 electrical power plant subject to the Florida Electrical Power  
7 Plant Siting Act.

8 (2) The applicant shall publish a notice of the proceeding  
9 in a newspaper of general circulation in each county in which  
10 the proposed electrical power plant will be located. The notice  
11 shall be at least one-quarter of a page and published at least  
12 21 days prior to the scheduled date for the proceeding. The  
13 commission shall publish notice of the proceeding in the manner  
14 specified by chapter 120 at least 21 days prior to the scheduled  
15 date for the proceeding.

16 (3) The commission shall be the sole forum for the  
17 determination of this matter, which accordingly shall not be  
18 raised in any other forum or in the review of proceedings in  
19 such other forum. In making its determination, the commission  
20 shall take into account the need for electric system reliability  
21 and integrity, the need for adequate electricity at a reasonable  
22 cost, the need to improve the balance of power plant fuel  
23 diversity and reduce Florida's dependence on fuel oil and  
24 natural gas, ~~for fuel diversity~~ and supply reliability, whether  
25 the proposed plant is the most cost-effective alternative  
26 available, and whether renewable energy sources and  
27 technologies, as well as conservation measures, are utilized to  
28 the extent reasonably available. The commission shall also

TAB 4 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 4 Language

ORIGINAL

YEAR

29 expressly consider the conservation measures taken by or  
 30 reasonably available to the applicant or its members which might  
 31 mitigate the need for the proposed plant and other matters  
 32 within its jurisdiction which it deems relevant. The  
 33 commission's determination of need for an electrical power plant  
 34 shall create a presumption of public need and necessity and  
 35 shall serve as the commission's report required by s.  
 36 403.507(4). An order entered pursuant to this section  
 37 constitutes final agency action.

38 (4) In making its determination on a proposed electrical  
 39 power plant using nuclear materials or synthesis gas produced by  
 40 integrated gasification combined cycle power plant as fuel, the  
 41 commission shall hold a hearing within 90 days after the filing  
 42 of the petition to determine need and shall issue an order  
 43 granting or denying the petition within 135 days after the date  
 44 of the filing of the petition. The commission shall be the sole  
 45 forum for the determination of this matter and the issues  
 46 addressed in the petition, which accordingly shall not be  
 47 reviewed in any other forum, or in the review of proceedings in  
 48 such other forum. In making its determination to either grant or  
 49 deny the petition, the commission shall take into account  
 50 ~~consider~~ the need for electric system reliability and integrity,  
 51 including fuel diversity, the need for base-load generating  
 52 capacity, the need for adequate electricity at a reasonable  
 53 cost, and whether renewable energy sources and technologies, as  
 54 well as conservation measures, are utilized to the extent  
 55 reasonably available.

56 (a) The applicant's petition shall include:

TAB 4 Language

ORIGINAL

YEAR

- 57 1. A description of the need for the generation capacity.
- 58 2. A description of how the proposed nuclear or integrated
- 59 gasification combined cycle power plant will enhance the
- 60 reliability of electric power production within the state by
- 61 improving the balance of power plant fuel diversity and reducing
- 62 Florida's dependence on fuel oil and natural gas.
- 63 3. A description of and a nonbinding estimate of the cost
- 64 of the nuclear or integrated gasification combined cycle power
- 65 plant, including any costs associated with new, expanded, or
- 66 relocated electrical transmission lines or facilities of any
- 67 size that are necessary to serve the nuclear power plant.
- 68 4. The annualized base revenue requirement for the first
- 69 12 months of operation of the nuclear or integrated gasification
- 70 combined cycle power plant.
- 71 5. Information on whether there were any discussions with
- 72 any electric utilities regarding ownership of a portion of the
- 73 nuclear or integrated gasification combined cycle power plant by
- 74 such electric utilities.
- 75 (b) In making its determination, the commission shall take
- 76 into account matters within its jurisdiction, which it deems
- 77 relevant, including whether the nuclear or integrated
- 78 gasification combined cycle power plant will:
- 79 1. Provide needed base-load capacity.
- 80 2. Enhance the reliability of electric power production
- 81 within the state by improving the balance of power plant fuel
- 82 diversity and reducing Florida's dependence on fuel oil and
- 83 natural gas.
- 84 3. Provide the most cost-effective source of power, taking

TAB 4 Language

TAB 4 Language

ORIGINAL

YEAR

85 into account the need to improve the balance of fuel diversity,  
 86 reduce Florida's dependence on fuel oil and natural gas, reduce  
 87 air emission compliance costs, and contribute to the long-term  
 88 stability and reliability of the electric grid.

89 (c) No provision of rule 25-22.082, Florida Administrative  
 90 Code, shall be applicable to a nuclear or integrated  
 91 gasification combined cycle power plant sited under this act,  
 92 including provisions for cost recovery, and an applicant shall  
 93 not otherwise be required to secure competitive proposals for  
 94 power supply prior to making application under this act or  
 95 receiving a determination of need from the commission.

96 (d) The commission's determination of need for a nuclear  
 97 or integrated gasification combined cycle power plant shall  
 98 create a presumption of public need and necessity and shall  
 99 serve as the commission's report required by s. 403.507(4)(a).  
 100 An order entered pursuant to this section constitutes final  
 101 agency action. Any petition for reconsideration of a final order  
 102 on a petition for need determination shall be filed within 5  
 103 days after the date of such order. The commission's final order,  
 104 including any order on reconsideration, shall be reviewable on  
 105 appeal in the Florida Supreme Court. Inasmuch as delay in the  
 106 determination of need will delay siting of a nuclear or  
 107 integrated gasification combined cycle power plant or diminish  
 108 the opportunity for savings to customers under the federal  
 109 Energy Policy Act of 2005, the Supreme Court shall proceed to  
 110 hear and determine the action as expeditiously as practicable  
 111 and give the action precedence over matters not accorded similar  
 112 precedence by law.

113 (e) After a petition for determination of need for a  
 114 nuclear or integrated gasification combined cycle power plant  
 115 has been granted, the right of a utility to recover any costs  
 116 incurred prior to commercial operation, including, but not  
 117 limited to, costs associated with the siting, design, licensing,  
 118 or construction of the plant and new, expanded, or relocated  
 119 electrical transmission lines or facilities of any size that are  
 120 necessary to serve the nuclear power plant, shall not be subject  
 121 to challenge unless and only to the extent the commission finds,  
 122 based on a preponderance of the evidence adduced at a hearing  
 123 before the commission under s. 120.57, that certain costs were  
 124 imprudently incurred. Proceeding with the construction of the  
 125 nuclear or integrated gasification combined cycle power plant  
 126 following an order by the commission approving the need for the  
 127 nuclear or integrated gasification combined cycle power plant  
 128 under this act shall not constitute or be evidence of  
 129 imprudence. Imprudence shall not include any cost increases due  
 130 to events beyond the utility's control. Further, a utility's  
 131 right to recover costs associated with a nuclear or integrated  
 132 gasification combined cycle power plant may not be raised in any  
 133 other forum or in the review of proceedings in such other forum.  
 134 Costs incurred prior to commercial operation shall be recovered  
 135 pursuant to chapter 366.

## **TAB 5 – Public Interest Determination for New Renewable Resources**

Require the PSC to establish criteria for evaluating proposed renewable energy facilities or negotiated renewable energy power purchase agreements and establish reporting criteria. The requirement would create a consistent framework by which the PSC would evaluate renewable proposals and determine whether they are in the public interest, establish what information utilities must provide, and what criteria renewable projects will be evaluated against. Given this new framework, remove the current law that requires the PSC to adopt rules for a renewable portfolio standard.

Based on the criteria established in Proposal 5, require the PSC to set an investor-owned utility limit of 1 percent or 75 MW, whichever is less, of its overall generation capacity portfolio in any one year of approved renewable energy investments where those investment costs are above the least cost alternative. Placing a cap on the overall effect on the utilities' generation portfolio will avoid unreasonable rate impacts on customers.

TAB 5 Language

ORIGINAL

YEAR

1 Section 1. Section 366.92, Florida Statutes, is amended to  
2 read:

3 366.92 Florida renewable energy policy.—

4 (1) It is the intent of the Legislature to promote the  
5 development of renewable energy; protect the economic viability  
6 of Florida's existing renewable energy facilities; diversify the  
7 types of fuel used to generate electricity in Florida; lessen  
8 Florida's dependence on natural gas and fuel oil for the  
9 production of electricity; minimize the volatility of fuel  
10 costs; encourage investment within the state; improve  
11 environmental conditions; and, at the same time, minimize the  
12 costs of power supply to electric utilities and their customers.

13 (2) As used in this section, the term:

14 (a) ~~"Florida renewable energy resources" means renewable~~  
15 ~~energy, as defined in s. 377.803, that is produced in Florida.~~

16 (b) ~~"Provider" means a~~ "Utility" means utility as defined  
17 in s. 366.8255(1) (a).

18 (c) "Renewable energy" means renewable energy as defined  
19 in s. 366.91(2) (d).

20 (d) "Renewable energy facility" means a renewable energy  
21 facility as defined in s. 366.91(2) (e). ~~"Renewable energy~~  
22 ~~credit" or "REC" means a product that represents the unbundled,~~  
23 ~~separable, renewable attribute of renewable energy produced in~~  
24 ~~Florida and is equivalent to 1 megawatt-hour of electricity~~  
25 ~~generated by a source of renewable energy located in Florida.~~

26 ~~(e) "Renewable portfolio standard" or "RPS" means the~~  
27 ~~minimum percentage of total annual retail electricity sales by a~~  
28 ~~provider to consumers in Florida that shall be supplied by~~

TAB 5 Language

ORIGINAL

YEAR

29 ~~renewable energy produced in Florida.~~

30 ~~(3) The commission shall adopt rules for a renewable~~  
 31 ~~portfolio standard requiring each provider to supply renewable~~  
 32 ~~energy to its customers directly, by procuring, or through~~  
 33 ~~renewable energy credits. In developing the RPS rule, the~~  
 34 ~~commission shall consult the Department of Environmental~~  
 35 ~~Protection and the Department of Agriculture and Consumer~~  
 36 ~~Services. The rule shall not be implemented until ratified by~~  
 37 ~~the Legislature. The commission shall present a draft rule for~~  
 38 ~~legislative consideration by February 1, 2009.~~

39 ~~(a) In developing the rule, the commission shall evaluate~~  
 40 ~~the current and forecasted levelized cost in cents per kilowatt~~  
 41 ~~hour through 2020 and current and forecasted installed capacity~~  
 42 ~~in kilowatts for each renewable energy generation method through~~  
 43 ~~2020.~~

44 ~~(b) The commission's rule:~~

45 ~~1. Shall include methods of managing the cost of~~  
 46 ~~compliance with the renewable portfolio standard, whether~~  
 47 ~~through direct supply or procurement of renewable power or~~  
 48 ~~through the purchase of renewable energy credits. The commission~~  
 49 ~~shall have rulemaking authority for providing annual cost~~  
 50 ~~recovery and incentive-based adjustments to authorized rates of~~  
 51 ~~return on common equity to providers to incentivize renewable~~  
 52 ~~energy. Notwithstanding s. 366.91(3) and (4), upon the~~  
 53 ~~ratification of the rules developed pursuant to this subsection,~~  
 54 ~~the commission may approve projects and power sales agreements~~  
 55 ~~with renewable power producers and the sale of renewable energy~~  
 56 ~~credits needed to comply with the renewable portfolio standard.~~

TAB 5 Language

TAB 5 Language

ORIGINAL

YEAR

57 ~~In the event of any conflict, this subparagraph shall supersede~~  
 58 ~~s. 366.91(3) and (4). However, nothing in this section shall~~  
 59 ~~alter the obligation of each public utility to continuously~~  
 60 ~~offer a purchase contract to producers of renewable energy.~~

61 ~~2. Shall provide for appropriate compliance measures and~~  
 62 ~~the conditions under which noncompliance shall be excused due to~~  
 63 ~~a determination by the commission that the supply of renewable~~  
 64 ~~energy or renewable energy credits was not adequate to satisfy~~  
 65 ~~the demand for such energy or that the cost of securing~~  
 66 ~~renewable energy or renewable energy credits was cost~~  
 67 ~~prohibitive.~~

68 ~~3. May provide added weight to energy provided by wind and~~  
 69 ~~solar photovoltaic over other forms of renewable energy, whether~~  
 70 ~~directly supplied or procured or indirectly obtained through the~~  
 71 ~~purchase of renewable energy credits.~~

72 ~~4. Shall determine an appropriate period of time for which~~  
 73 ~~renewable energy credits may be used for purposes of compliance~~  
 74 ~~with the renewable portfolio standard.~~

75 ~~5. Shall provide for monitoring of compliance with and~~  
 76 ~~enforcement of the requirements of this section.~~

77 ~~6. Shall ensure that energy credited toward compliance~~  
 78 ~~with the requirements of this section is not credited toward any~~  
 79 ~~other purpose.~~

80 ~~7. Shall include procedures to track and account for~~  
 81 ~~renewable energy credits, including ownership of renewable~~  
 82 ~~energy credits that are derived from a customer-owned renewable~~  
 83 ~~energy facility as a result of any action by a customer of an~~  
 84 ~~electric power supplier that is independent of a program~~

TAB 5 Language

CODING: Words stricken are deletions; words underlined are additions.

TAB 5 Language

ORIGINAL

YEAR

85 ~~sponsored by the electric power supplier.~~

86 ~~8. Shall provide for the conditions and options for the~~  
 87 ~~repeal or alteration of the rule in the event that new~~  
 88 ~~provisions of federal law supplant or conflict with the rule.~~

89 ~~(e) Beginning on April 1 of the year following final~~  
 90 ~~adoption of the commission's renewable portfolio standard rule,~~  
 91 ~~each provider shall submit a report to the commission describing~~  
 92 ~~the steps that have been taken in the previous year and the~~  
 93 ~~steps that will be taken in the future to add renewable energy~~  
 94 ~~to the provider's energy supply portfolio. The report shall~~  
 95 ~~state whether the provider was in compliance with the renewable~~  
 96 ~~portfolio standard during the previous year and how it will~~  
 97 ~~comply with the renewable portfolio standard in the upcoming~~  
 98 ~~year.~~

99 (3)-(4) Upon the filing of a petition by a utility the  
 100 commission shall make a public interest determination regarding  
 101 investments in renewable energy.

102 (a) The criteria the commission shall use for evaluating  
 103 whether proposed renewable energy facilities or negotiated  
 104 renewable energy purchased power agreements are in the public  
 105 interest shall include at a minimum whether the proposed  
 106 facilities or negotiated purchased power agreements:

107 1. Provide adequate electricity at a reasonable cost;  
 108 2. Diversify the types of fuel used to generate  
 109 electricity in Florida in order to promote reliable electric  
 110 service;

111 3. Help lessen Florida's dependence on imported fuels for  
 112 the production of electricity;

TAB 5 Language

ORIGINAL

YEAR

113 4. Reduce the risk of fuel cost volatility in Florida,  
 114 thereby promoting rate stability;

115 5. Reduce regulatory costs with adverse environmental  
 116 impacts in Florida;

117 6. Promote economic development.

118 (b) Any renewable energy project proposed by a utility  
 119 pursuant to this section shall be put out to competitive bid.

120 (c) The commission shall provide minimum requirements and  
 121 information to be included in a Request for Proposal (RFP) and  
 122 other information related to the RFP process.

123 (d) Utilities shall report to the commission on an annual  
 124 basis the status of approved renewable energy facilities and,  
 125 upon operation, specific data on job creation, fuel displaced by  
 126 renewable energy, operational statistics and any other  
 127 information deemed relevant by the commission in assessing the  
 128 benefits of the projects to the state and the need for  
 129 additional renewable generation.

130 (4) UTILITY INVESTMENTS IN A NEW RENEWABLE ENERGY  
 131 FACILITY.--

132 (a) Upon petition by the utility, the commission shall have  
 133 the authority to approve for cost recovery purposes, the costs  
 134 associated with a utility self-built renewable energy facility  
 135 or negotiated purchase power agreement that has been determined  
 136 to be in the public interest.

137 (b) The commission shall provide for cost recovery in its  
 138 annual cost recovery proceedings of all reasonable and prudent  
 139 costs incurred by a utility pursuant to this section.

140 (c) Total annual investments made under this provision for

TAB 5 Language

ORIGINAL

YEAR

141 self-built renewable energy facilities that are above avoided  
 142 costs as defined by 366.051 F.S. shall not exceed 1% or 75 MW,  
 143 whichever is less, of the utilities' overall generation  
 144 portfolio in any one year.

145 (5) Revenues derived from any renewable energy credit,  
 146 carbon credit, or other mechanism that attributes value to the  
 147 production of renewable energy, either existing or hereafter  
 148 devised, received by a provider by virtue of the production or  
 149 purchase of renewable energy for which cost recovery is approved  
 150 under this subsection with the provider's ratepayers such that  
 151 the rates are credited at least 70 percent of such revenues.

152 ~~In order to demonstrate the feasibility and viability of clean~~  
 153 ~~energy systems, the commission shall provide for full cost~~  
 154 ~~recovery under the environmental cost recovery clause of all~~  
 155 ~~reasonable and prudent costs incurred by a provider for~~  
 156 ~~renewable energy projects that are zero greenhouse gas emitting~~  
 157 ~~at the point of generation, up to a total of 110 megawatts~~  
 158 ~~statewide, and for which the provider has secured necessary~~  
 159 ~~land, zoning permits, and transmission rights within the state.~~  
 160 ~~Such costs shall be deemed reasonable and prudent for purposes~~  
 161 ~~of cost recovery so long as the provider has used reasonable and~~  
 162 ~~customary industry practices in the design, procurement, and~~  
 163 ~~construction of the project in a cost-effective manner~~  
 164 ~~appropriate to the location of the facility. The provider shall~~  
 165 ~~report to the commission as part of the cost-recovery~~  
 166 ~~proceedings the construction costs, in-service costs, operating~~  
 167 ~~and maintenance costs, hourly energy production of the renewable~~  
 168 ~~energy project, and any other information deemed relevant by the~~

ORIGINAL

YEAR

169 ~~commission. Any provider constructing a clean energy facility~~  
 170 ~~pursuant to this section shall file for cost recovery no later~~  
 171 ~~than July 1, 2009.~~

172       (6) ~~(5)~~ Each municipal electric utility and rural electric  
 173 cooperative shall develop standards for the promotion,  
 174 encouragement, and expansion of the use of renewable energy  
 175 resources and energy conservation and efficiency measures. On or  
 176 before April 1, 2009, and annually thereafter, each municipal  
 177 electric utility and electric cooperative shall submit to the  
 178 commission a report that identifies such standards.

179       (7) ~~(6)~~ Nothing in this section shall be construed to  
 180 impede or impair terms and conditions of existing contracts.

181       (8) ~~(7)~~ The commission shall ~~may~~ adopt rules to administer  
 182 and implement the provisions of this section by January 1, 2013.

## **TAB 6 – Renewable Energy Financing Projects**

Allow a utility to invest in a PSC approved financing project with renewable energy facilities in Florida. Currently this type of utility financing project is allowed with government solid waste facilities, but not with private renewable energy facilities. A joint utility and private renewable energy financing project would allow the utility to recover its expenses and a reasonable profit. This would promote investment by utilities in renewable energy facilities, when such a contract is determined by the PSC to be in the public interest.

TAB 6 Language

ORIGINAL

YEAR

1 Section 1. Section 366.91, Florida Statutes, is amended to  
2 read:

3 366.91 Renewable energy.—

4 (1) The Legislature finds that it is in the public  
5 interest to promote the development of renewable energy  
6 resources in this state. Renewable energy resources have the  
7 potential to help diversify fuel types to meet Florida's growing  
8 dependency on natural gas for electric production, minimize the  
9 volatility of fuel costs, encourage investment within the state,  
10 improve environmental conditions, and make Florida a leader in  
11 new and innovative technologies.

12 (2) As used in this section, the term:

13 (a) "Biomass" means a power source that is comprised of,  
14 but not limited to, combustible residues or gases from forest  
15 products manufacturing, waste, byproducts, or products from  
16 agricultural and orchard crops, waste or coproducts from  
17 livestock and poultry operations, waste or byproducts from food  
18 processing, urban wood waste, municipal solid waste, municipal  
19 liquid waste treatment operations, and landfill gas.

20 (b) "Customer-owned renewable generation" means an  
21 electric generating system located on a customer's premises that  
22 is primarily intended to offset part or all of the customer's  
23 electricity requirements with renewable energy.

24 (c) "Net metering" means a metering and billing  
25 methodology whereby customer-owned renewable generation is  
26 allowed to offset the customer's electricity consumption on  
27 site.

28 (d) "Renewable energy" means electrical energy produced

29 | from a method that uses one or more of the following fuels or  
 30 | energy sources: hydrogen produced from sources other than fossil  
 31 | fuels, biomass, solar energy, geothermal energy, wind energy,  
 32 | ocean energy, and hydroelectric power. The term includes the  
 33 | alternative energy resource, waste heat, from sulfuric acid  
 34 | manufacturing operations and electrical energy produced using  
 35 | pipeline-quality synthetic gas produced from waste petroleum  
 36 | coke with carbon capture and sequestration.

37 |       (e) "Renewable energy facility" means a facility that  
 38 | produces electric energy in Florida as defined by renewable  
 39 | energy in (d).

40 |       (3) On or before January 1, 2006, each public utility must  
 41 | continuously offer a purchase contract to producers of renewable  
 42 | energy. The commission shall establish requirements relating to  
 43 | the purchase of capacity and energy by public utilities from  
 44 | renewable energy producers and may adopt rules to administer  
 45 | this section. The contract shall contain payment provisions for  
 46 | energy and capacity which are based upon the utility's full  
 47 | avoided costs, as defined in s. 366.051; however, capacity  
 48 | payments are not required if, due to the operational  
 49 | characteristics of the renewable energy generator or the  
 50 | anticipated peak and off-peak availability and capacity factor  
 51 | of the utility's avoided unit, the producer is unlikely to  
 52 | provide any capacity value to the utility or the electric grid  
 53 | during the contract term. Each contract must provide a contract  
 54 | term of at least 10 years. Prudent and reasonable costs  
 55 | associated with a renewable energy contract shall be recovered  
 56 | from the ratepayers of the contracting utility, without

ORIGINAL

YEAR

57 differentiation among customer classes, through the appropriate  
 58 cost-recovery clause mechanism administered by the commission.

59 (4) On or before January 1, 2006, each municipal electric  
 60 utility and rural electric cooperative whose annual sales, as of  
 61 July 1, 1993, to retail customers were greater than 2,000  
 62 gigawatt hours must continuously offer a purchase contract to  
 63 producers of renewable energy containing payment provisions for  
 64 energy and capacity which are based upon the utility's or  
 65 cooperative's full avoided costs, as determined by the governing  
 66 body of the municipal utility or cooperative; however, capacity  
 67 payments are not required if, due to the operational  
 68 characteristics of the renewable energy generator or the  
 69 anticipated peak and off-peak availability and capacity factor  
 70 of the utility's avoided unit, the producer is unlikely to  
 71 provide any capacity value to the utility or the electric grid  
 72 during the contract term. Each contract must provide a contract  
 73 term of at least 10 years.

74 (5) On or before January 1, 2009, each public utility  
 75 shall develop a standardized interconnection agreement and net  
 76 metering program for customer-owned renewable generation. The  
 77 commission shall establish requirements relating to the  
 78 expedited interconnection and net metering of customer-owned  
 79 renewable generation by public utilities and may adopt rules to  
 80 administer this section.

81 (6) On or before July 1, 2009, each municipal electric  
 82 utility and each rural electric cooperative that sells  
 83 electricity at retail shall develop a standardized  
 84 interconnection agreement and net metering program for customer-

TAB 6 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 6 Language

ORIGINAL

YEAR

85 owned renewable generation. Each governing authority shall  
 86 establish requirements relating to the expedited interconnection  
 87 and net metering of customer-owned generation. By April 1 of  
 88 each year, each municipal electric utility and rural electric  
 89 cooperative utility serving retail customers shall file a report  
 90 with the commission detailing customer participation in the  
 91 interconnection and net metering program, including, but not  
 92 limited to, the number and total capacity of interconnected  
 93 generating systems and the total energy net metered in the  
 94 previous year.

95 (7) Under the provisions of subsections (5) and (6), when  
 96 a utility purchases power generated from biogas produced by the  
 97 anaerobic digestion of agricultural waste, including food waste  
 98 or other agricultural byproducts, net metering shall be  
 99 available at a single metering point or as a part of conjunctive  
 100 billing of multiple points for a customer at a single location,  
 101 so long as the provision of such service and its associated  
 102 charges, terms, and other conditions are not reasonably  
 103 projected to result in higher cost electric service to the  
 104 utility's general body of ratepayers or adversely affect the  
 105 adequacy or reliability of electric service to all customers, as  
 106 determined by the commission for public utilities, or as  
 107 determined by the governing authority of the municipal electric  
 108 utility or rural electric cooperative that serves at retail.

109 (8) A contracting producer of renewable energy must pay  
 110 the actual costs of its interconnection with the transmission  
 111 grid or distribution system.

112 (9) FINANCING PROJECTS -

TAB 6 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 6 Language

ORIGINAL

YEAR

113        (a) Upon the filing of a petition for approval by a  
 114 public utility under this section, the commission shall have the  
 115 authority to allow the public utility to enter into a contract  
 116 with a renewable energy facility to provide financing to such  
 117 renewable energy facility for the construction of the electrical  
 118 component of that facility.

119        (b) When reviewing a petition, the commission shall  
 120 consider the criteria set forth in 366.92(3) F.S.

121        (c) The public utility must currently be providing  
 122 electrical energy at retail within the geographic area the  
 123 renewable energy facility is located.

124        (d) The amount of financing, including all carrying costs,  
 125 plus reasonable and prudent administrative costs incurred by the  
 126 public utility, must be recovered from the ratepayers of the  
 127 public utility pursuant to the provisions of the Florida Energy  
 128 Efficiency and Conservation Act. A public utility may not be  
 129 required to pay to the renewable energy facility any funding in  
 130 excess of that collected from its ratepayers.

131        (10) FINANCING PROJECTS-CAPACITY PAYMENTS AND REFUNDS.—As  
 132 pertaining to the Financing Projects Program pursuant to  
 133 paragraph (9), the amounts required of a public utility as  
 134 financing-capacity payments shall be paid to the renewable  
 135 energy facility during the construction of the project as  
 136 established by the contract and approved by the commission. Such  
 137 payments are subject to being refunded in full or  
 138 proportionately to the public utility if the electrical  
 139 component of the renewable energy facility fails. Any refund  
 140 shall be calculated and paid annually. If during the life of the

TAB 6 Language

TAB 6 Language

ORIGINAL

YEAR

141 contract a renewable energy facility is abandoned, closed down,  
 142 or rendered illegal by applicable law, ordinance, or regulation,  
 143 the full amount of any unrefunded financing-capacity payments is  
 144 subject to being refunded to the public utility. Any refund by a  
 145 renewable energy facility of financing-capacity payments to a  
 146 public utility shall be refunded by the public utility to its  
 147 customers as a credit shown on the customers' bills as soon as  
 148 is practicable after the receipt of the refunded portions. The  
 149 obligation to make a refund is binding on the renewable energy  
 150 facility and its successors in interest. In the case of a  
 151 combination of renewable energy facilities, if such combination  
 152 is dissolved or otherwise ceases to function, the refund is a  
 153 legal and binding obligation of the individual renewable energy  
 154 facilities which participated in the formation of the  
 155 combination, in proportion to their interests.

156 (11) ELECTRIC ENERGY PRICING PROGRAM.—As pertaining to the  
 157 Financing Project Program in paragraph (9), the commission shall  
 158 establish rules relating to the purchase of capacity or energy  
 159 by electric utilities as defined in this section from renewable  
 160 energy facilities. The commission shall authorize levelized  
 161 payments for purchase of capacity or energy from a renewable  
 162 energy facility. Payments provided pursuant to this subsection  
 163 are subject to the terms and conditions set forth in subsection  
 164 (10) for financing-capacity payments, and such payments are  
 165 recoverable from ratepayers of the electric utility as provided  
 166 in subparagraph (9) (d).

## **TAB 7 – Agency Energy Reporting**

Require all buildings in the state building fleet, 5,000 square feet or more of conditioned space, to report their energy consumption, and requires the Department of Management Services to go to rule making in coordination with DACS to establish standard and uniform benchmarking and reporting requirements. Currently this reporting is not standardized across state agencies making the reporting incomplete and inaccurate.

TAB 7 Language

ORIGINAL

YEAR

1 Section 1. Section 255.257, Florida Statutes, is amended  
 2 to read:

3 255.257 Energy management; buildings occupied by state  
 4 agencies.—

5 (1) ENERGY CONSUMPTION AND COST DATA.—Each state agency  
 6 shall collect data on energy consumption and cost. The data  
 7 gathered shall be on state-owned facilities and metered state-  
 8 leased facilities used by the state of 5,000 net square feet or  
 9 more of conditioned space ~~of 5,000 net square feet or more.~~ This  
 10 ~~These~~ data will be used in the computation of the effectiveness  
 11 of the state energy management plan and the effectiveness of the  
 12 energy management program of each of the state agencies.  
 13 Collected data shall be reported annually to the department in a  
 14 format prescribed by the department.

15 (2) ENERGY MANAGEMENT COORDINATORS.—Each state agency, the  
 16 Florida Public Service Commission, the Department of Military  
 17 Affairs, and the judicial branch shall appoint a coordinator  
 18 whose responsibility shall be to advise the head of the state  
 19 agency on matters relating to energy consumption in facilities  
 20 under the control of that head or in space occupied by the  
 21 various units comprising that state agency, in vehicles operated  
 22 by that state agency, and in other energy-consuming activities  
 23 of the state agency. The coordinator shall implement the energy  
 24 management program agreed upon by the state agency concerned and  
 25 assist the department in the development of the State Energy  
 26 Management Plan.

27 (3) CONTENTS OF THE STATE ENERGY MANAGEMENT PLAN.—The  
 28 Department of Management Services in coordination with The

TAB 7 Language

TAB 7 Language

ORIGINAL

YEAR

29 Department of Agriculture and Consumer Services shall adopt  
 30 rules and forms for the development of the ~~develop~~ a state  
 31 energy management plan consisting of, but not limited to, the  
 32 following elements:

- 33       (a) Data-gathering requirements;
- 34       **(b) Standard and uniform benchmarking requirements as a**  
 35 **measure to evaluate the energy efficiency of state-owned and**  
 36 **leased buildings;**
- 37       **(c)** ~~(b)~~ Building energy audit procedures;
- 38       **(d)** ~~(e)~~ Standard and uniform ~~Uniform~~ data analysis and  
 39 reporting procedures;
- 40       **(e)** ~~(d)~~ Employee energy education program measures;
- 41       **(f)** ~~(e)~~ Energy consumption reduction techniques;
- 42       **(g)** ~~(f)~~ Training program for state agency energy management  
 43 coordinators; and
- 44       **(h)** ~~(g)~~ Guidelines for building managers.

45  
 46 The plan shall include a description of actions that state  
 47 agencies shall take to reduce consumption of electricity and  
 48 nonrenewable energy sources used for space heating and cooling,  
 49 ventilation, lighting, water heating, and transportation.

50       (4) ADOPTION OF STANDARDS.—

51       (a) All state agencies shall adopt a standard and uniform  
 52 state-wide sustainable building rating system or use a national  
 53 model green building code for all new buildings and renovations  
 54 to existing buildings.

55       (b) No state agency shall enter into new leasing  
 56 agreements for office space that does not meet Energy Star

TAB 7 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 7 Language

ORIGINAL

YEAR

57 building standards, except when the appropriate state agency  
 58 head determines that no other viable or cost-effective  
 59 alternative exists.

60 (c) All state agencies shall develop energy conservation  
 61 measures and guidelines for new and existing office space where  
 62 state agencies occupy ~~more than~~ 5,000 square feet or more of  
 63 conditioned space. These conservation measures shall focus on  
 64 programs that may reduce energy consumption and, when  
 65 established, provide a net reduction in occupancy costs.

## **TAB 8 – Energy Efficiency and Conservation Evaluations**

The legislature should direct DACS's Office of Energy in coordination with the Florida Energy Systems Consortium to evaluate methods to promote energy conservation and efficiency. Further, it should provide the consumer clear guidance on energy efficiency savings. The report should be completed by March 1, 2013, and presented to the Governor and the legislature.

Also, the legislature should require the PSC to evaluate how the Florida Energy Efficiency and Conservation Act (FEECA) statutes provide conservation and efficiency programs that are in the public interest and without undue burden on the customer.

TAB 8 Language

ORIGINAL

YEAR

1           Section 1. The Department of Agriculture and Consumer  
 2 Services' Office of Energy in consultation with the Florida  
 3 Public Service Commission, the Florida Building Commission and  
 4 the Florida Energy Systems Consortium shall develop a  
 5 clearinghouse of information regarding cost savings associated  
 6 with various energy efficiency and conservation measures. The  
 7 Department shall post the information on its website by July 1,  
 8 2013.

9           Section 2. The Florida Public Service Commission (PSC)  
 10 shall evaluate and prepare a report on the Florida Energy  
 11 Efficiency and Conservation Act (FEECA) statutes and determine  
 12 whether they remain in the public interest. The evaluation shall  
 13 consider the costs to ratepayers, the incentives and  
 14 disincentives associated with FEECA, and whether the programs  
 15 create benefits without undue burden on the customer. The models  
 16 and methods used to determine conservation goals shall be  
 17 specifically addressed in the report. The PSC shall submit the  
 18 report to the President of the Senate, the Speaker of the House  
 19 of Representatives, and the Executive Office of the Governor no  
 20 later than January 31, 2013.

## **TAB 9 – Electric Vehicle Charging Stations**

Clarify that electric vehicle charging stations are a service to the public and not the retail sale of electricity. This ensures that government entities or businesses installing and providing this service are not subject to the undue burden of regulatory fees that may be instituted by the PSC if they were to be considered retailers of electricity.

- Would direct the Florida Building Commission in coordination with DACS and the PSC to adopt rules to standardize the building and electric codes, permitting, and installation of the charging stations.
- Also would direct DACS to adopt rules to address definitions, method of sale, labeling requirements and price posting requirements to allow for consistency for consumers and the industry.
- The PSC is also instructed to conduct a study of the effects of the charging stations on energy consumption in the state as well as the effects on the grid.

TAB 9 Language

ORIGINAL

YEAR

1 Section 1. Section 366.94, Florida Statutes, is created to  
2 read:

3 366.94 - Electric Vehicle Charging Stations.--

4 (1) The Legislature finds that the provision of electric  
5 vehicle charging to the public is a service and not the retail  
6 sale of electricity. The rates, terms and conditions of  
7 electric vehicle charging services are not subject to regulation  
8 under this chapter regardless of the provider. Nothing in this  
9 section affects the ability of individuals, businesses or  
10 government entities to acquire install and/or utilize an  
11 electric vehicle charger for their own use for their own  
12 vehicles.

13 (2) The Florida Building Commission in coordination with  
14 the Department of Agriculture and Consumer Services and the  
15 Public Service Commission shall develop rules to provide uniform  
16 standards for building and electric codes, local permitting and  
17 installation of electric vehicle charging stations. The  
18 development of these standards is expressly preempted to the  
19 state and the Florida Building Commission in coordination with  
20 the Department of Agriculture and Consumer Services and the  
21 Public Service Commission. Any local government enforcing the  
22 subject areas of the standards established by this section must  
23 use the standards set forth pursuant to this section.

24 (3) The Department of Agriculture and Consumer Services  
25 shall develop rules to provide definitions, methods of sale,  
26 labeling requirements and price posting requirements for  
27 electric vehicle charging stations to allow for consistency for  
28 consumers and the industry.

TAB 9 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 9 Language

ORIGINAL

YEAR

29        (4) The Public Service Commission is directed to conduct a  
 30 study of the effects of the charging stations on energy  
 31 consumption in the state as well as the effects on the grid. The  
 32 Public Service Commission shall also investigate the feasibility  
 33 of using off-grid solar photovoltaic power as a source of  
 34 electricity for the electric vehicle charging stations.

35        (5) Parking spaces for electric vehicle charging stations.-

36        (a) It is unlawful for a person to stop, stand, or park a  
 37 vehicle that is not capable of using an electrical recharging  
 38 station within any parking space specifically designated for  
 39 charging an electric vehicle.

40        (b) If a law enforcement officer finds a motor vehicle in  
 41 violation of this section, the officer or specialist shall  
 42 charge the operator or other person in charge of the vehicle in  
 43 violation with a noncriminal traffic infraction, punishable as  
 44 provided in s. 316.008(4) or s. 318.18.

## **TAB 10 – Streamlining Permitting for Biofuel Feedstock Crops**

Require DACS in consultation with the University of Florida/Institute for Food and Agriculture Sciences to determine whether a plant material is exempt from the regulatory permitting process based on scientific evidence and practical experience. This would streamline the permitting process for feedstock crops for biofuels.

TAB 10 Language

ORIGINAL

YEAR

1 Section 1. Section 581.083, Florida Statutes, is amended  
 2 to read:

3 581.083 Introduction or release of plant pests, noxious  
 4 weeds, or organisms affecting plant life; cultivation of  
 5 nonnative plants; special permit and security required.-

6 (1) The introduction into or release within this state of  
 7 any plant pest, noxious weed, genetically engineered plant or  
 8 plant pest, or any other organism which may directly or  
 9 indirectly affect the plant life of this state as an injurious  
 10 pest, parasite, or predator of other organisms, or any  
 11 arthropod, is prohibited, except under special permit issued by  
 12 the department through the division, which shall be the sole  
 13 issuing agency for such special permits.

14 (2) Each application for a special permit shall be  
 15 accompanied by a fee in an amount determined by the department,  
 16 through its rulemaking authority, not to exceed \$50. The  
 17 department may waive this fee by rule for governmental agencies.

18 (3) Except for research projects approved by the  
 19 department, no permit for any organism shall be issued unless  
 20 the department has determined that the parasite, predator, or  
 21 biological control agent is specific to a target organism or  
 22 plant and not likely to become a pest of plants or other  
 23 beneficial organisms. The department may rely on findings of the  
 24 Department of Environmental Protection, the United States  
 25 Department of Agriculture, and other agencies in making any  
 26 determination about organisms used for biological control.

27 (4) A person may not cultivate a nonnative plant, algae,  
 28 or blue green algae, including a genetically engineered plant,

TAB 10 Language

ORIGINAL

YEAR

29 algae, or blue green algae, ~~or a plant that has been introduced,~~  
 30 ~~for purposes of fuel production or purposes other than~~  
 31 ~~agriculture~~ in plantings greater in size than 2 contiguous  
 32 acres, except under a special permit issued by the department  
 33 through the division, which is the sole agency responsible for  
 34 issuing such special permits. Such a permit shall not be  
 35 required if the department determines, after consulting in  
 36 ~~conjunction~~ with the Institute of Food and Agricultural Sciences  
 37 at the University of Florida, that based on experience or  
 38 research data, the nonnative plant, algae, or blue green algae,  
 39 does not pose a known threat of becoming an ~~is not~~ invasive  
 40 species or a pest of plants or native fauna under Florida  
 41 conditions and subsequently exempts the plant by rule.

42 (a)1. Each application for a special permit must be  
 43 accompanied by a fee as described in subsection (2) and proof  
 44 that the applicant has obtained, on a form approved by the  
 45 department, ~~a bond in the form approved by the department and~~  
 46 issued by a surety company admitted to do business in this state  
 47 or a certificate of deposit, or other type of security adopted  
 48 by rule of the Department which provides a financial assurance  
 49 of cost recovery for the removal of a planting. The application  
 50 must include, on a form provided by the department, the name of  
 51 the applicant and the applicant's address or the address of the  
 52 applicant's principal place of business; a statement completely  
 53 identifying the nonnative plant to be cultivated; and a  
 54 statement of the estimated cost of removing and destroying the  
 55 plant that is the subject of the special permit and the basis  
 56 for calculating or determining that estimate. If the applicant

TAB 10 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 10 Language

ORIGINAL

YEAR

57 | is a corporation, partnership, or other business entity, the  
 58 | applicant must also provide in the application the name and  
 59 | address of each officer, partner, or managing agent. The  
 60 | applicant shall notify the department within 10 business days of  
 61 | any change of address or change in the principal place of  
 62 | business. The department shall mail all notices to the  
 63 | applicant's last known address.

64 |         2. As used in this subsection, the term "certificate of  
 65 | deposit" means a certificate of deposit at any recognized  
 66 | financial institution doing business in the United States. The  
 67 | department may not accept a certificate of deposit in connection  
 68 | with the issuance of a special permit unless the issuing  
 69 | institution is properly insured by the Federal Deposit Insurance  
 70 | Corporation or the Federal Savings and Loan Insurance  
 71 | Corporation.

72 |         (b) Upon obtaining a permit, the permitholder may annually  
 73 | cultivate and maintain the nonnative plants as authorized by the  
 74 | special permit. If the permitholder ceases to maintain or  
 75 | cultivate the plants authorized by the special permit, if the  
 76 | permit expires, or if the permitholder ceases to abide by the  
 77 | conditions of the special permit, the permitholder shall  
 78 | immediately remove and destroy the plants that are subject to  
 79 | the permit, if any remain. The permitholder shall notify the  
 80 | department of the removal and destruction of the plants within  
 81 | 10 days after such event.

82 |         (c) If the department:

83 |             1. Determines that the permitholder is no longer  
 84 | maintaining or cultivating the plants subject to the special

TAB 10 Language

ORIGINAL

YEAR

85 permit and has not removed and destroyed the plants authorized  
86 by the special permit;  
87       2. Determines that the continued maintenance or  
88 cultivation of the plants presents an imminent danger to public  
89 health, safety, or welfare;  
90       3. Determines that the permitholder has exceeded the  
91 conditions of the authorized special permit; or  
92       4. Receives a notice of cancellation of the surety bond,  
93  
94 the department may issue an immediate final order, which shall  
95 be immediately appealable or enjoicable as provided by chapter  
96 120, directing the permitholder to immediately remove and  
97 destroy the plants authorized to be cultivated under the special  
98 permit. A copy of the immediate final order shall be mailed to  
99 the permitholder and to the surety company or financial  
100 institution that has provided security for the special permit,  
101 if applicable.  
102       (d) If, upon issuance by the department of an immediate  
103 final order to the permitholder, the permitholder fails to  
104 remove and destroy the plants subject to the special permit  
105 within 60 days after issuance of the order, or such shorter  
106 period as is designated in the order as public health, safety,  
107 or welfare requires, the department may enter the cultivated  
108 acreage and remove and destroy the plants that are the subject  
109 of the special permit. If the permitholder makes a written  
110 request to the department for an extension of time to remove and  
111 destroy the plants that demonstrates specific facts showing why  
112 the plants could not reasonably be removed and destroyed in the

TAB 10 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 10 Language

ORIGINAL

YEAR

113 applicable timeframe, the department may extend the time for  
 114 removing and destroying plants subject to a special permit. The  
 115 reasonable costs and expenses incurred by the department for  
 116 removing and destroying plants subject to a special permit shall  
 117 be reimbursed to the department by the permitholder within 21  
 118 days after the date the permitholder and the surety company or  
 119 financial institution are served a copy of the department's  
 120 invoice for the costs and expenses incurred by the department to  
 121 remove and destroy the cultivated plants, along with a notice of  
 122 administrative rights, unless the permitholder or the surety  
 123 company or financial institution object to the reasonableness of  
 124 the invoice. In the event of an objection, the permitholder or  
 125 surety company or financial institution is entitled to an  
 126 administrative proceeding as provided by chapter 120. Upon entry  
 127 of a final order determining the reasonableness of the incurred  
 128 costs and expenses, the permitholder shall have 15 days  
 129 following service of the final order to reimburse the  
 130 department. Failure of the permitholder to timely reimburse the  
 131 department for the incurred costs and expenses entitles the  
 132 department to reimbursement from the applicable bond or  
 133 certificate of deposit.

134 (e) Each permitholder shall maintain for each separate  
 135 growing location a bond or a certificate of deposit in an amount  
 136 determined by the department, but not more ~~less~~ than 150 percent  
 137 of the estimated cost of removing and destroying the cultivated  
 138 plants. The bond or certificate of deposit may not exceed \$5,000  
 139 per acre, unless a higher amount is determined by the department  
 140 to be necessary to protect the public health, safety, and

TAB 10 Language

ORIGINAL

YEAR

141 welfare or unless an exemption is granted by the department  
 142 based on conditions specified in the application which would  
 143 preclude the department from incurring the cost of removing and  
 144 destroying the cultivated plants and would prevent injury to the  
 145 public health, safety, and welfare. The aggregate liability of  
 146 the surety company or financial institution to all persons for  
 147 all breaches of the conditions of the bond or certificate of  
 148 deposit may not exceed the amount of the bond or certificate of  
 149 deposit. The original bond or certificate of deposit required by  
 150 this subsection shall be filed with the department. A surety  
 151 company shall give the department 30 days' written notice of  
 152 cancellation, by certified mail, in order to cancel a bond.  
 153 Cancellation of a bond does not relieve a surety company of  
 154 liability for paying to the department all costs and expenses  
 155 incurred or to be incurred for removing and destroying the  
 156 permitted plants covered by an immediate final order authorized  
 157 under paragraph (c). A bond or certificate of deposit must be  
 158 provided or assigned in the exact name in which an applicant  
 159 applies for a special permit. The penal sum of the bond or  
 160 certificate of deposit to be furnished to the department by a  
 161 permitholder in the amount specified in this paragraph must  
 162 guarantee payment of the costs and expenses incurred or to be  
 163 incurred by the department for removing and destroying the  
 164 plants cultivated under the issued special permit. The bond or  
 165 certificate of deposit assignment or agreement must be upon a  
 166 form prescribed or approved by the department and must be  
 167 conditioned to secure the faithful accounting for and payment of  
 168 all costs and expenses incurred by the department for removing

TAB 10 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 10 Language

ORIGINAL

YEAR

169 and destroying all plants cultivated under the special permit.  
 170 The bond or certificate of deposit assignment or agreement must  
 171 include terms binding the instrument to the Commissioner of  
 172 Agriculture. Such certificate of deposit shall be presented with  
 173 an assignment of the permitholder's rights in the certificate in  
 174 favor of the Commissioner of Agriculture on a form prescribed by  
 175 the department and with a letter from the issuing institution  
 176 acknowledging that the assignment has been properly recorded on  
 177 the books of the issuing institution and will be honored by the  
 178 issuing institution. Such assignment is irrevocable while a  
 179 special permit is in effect and for an additional period of 6  
 180 months after termination of the special permit if operations to  
 181 remove and destroy the permitted plants are not continuing and  
 182 if the department's invoice remains unpaid by the permitholder  
 183 under the issued immediate final order. If operations to remove  
 184 and destroy the plants are pending, the assignment remains in  
 185 effect until all plants are removed and destroyed and the  
 186 department's invoice has been paid. The bond or certificate of  
 187 deposit may be released by the assignee of the surety company or  
 188 financial institution to the permitholder, or to the  
 189 permitholder's successors, assignee, or heirs, if operations to  
 190 remove and destroy the permitted plants are not pending and no  
 191 invoice remains unpaid at the conclusion of 6 months after the  
 192 last effective date of the special permit. The department may  
 193 not accept a certificate of deposit that contains any provision  
 194 that would give to any person any prior rights or claim on the  
 195 proceeds or principal of such certificate of deposit. The  
 196 department shall determine by rule whether an annual bond or

TAB 10 Language

CODING: Words ~~stricken~~ are deletions; words underlined are additions.

TAB 10 Language

ORIGINAL

YEAR

197 certificate of deposit will be required. The amount of such bond  
 198 or certificate of deposit shall be increased, upon order of the  
 199 department, at any time if the department finds such increase to  
 200 be warranted by the cultivating operations of the permitholder.  
 201 In the same manner, the amount of such bond or certificate of  
 202 deposit may be adjusted downward or removed ~~decreased~~ when a  
 203 decrease in the cultivating operations of the permitholder  
 204 occurs or research or practical field knowledge and observation  
 205 indicates low risk of invasiveness by the nonnative species ~~the~~  
 206 ~~cultivating operations warrants such decrease.~~ Factors that may  
 207 be considered for change include multiple years or cycles of  
 208 successful large scale contained cultivation, no observation of  
 209 plant, algae, or blue green algae, escape from managed areas or  
 210 science-based evidence that established to approved adjusted  
 211 cultivation practices will provide a similar level of  
 212 containment of the nonnative plant, algae, or blue green algae.  
 213 This paragraph applies to any bond or certificate of deposit,  
 214 regardless of the anniversary date of its issuance, expiration,  
 215 or renewal.

216 (f) In order to carry out the purposes of this subsection,  
 217 the department or its agents may require from any permitholder  
 218 verified statements of the cultivated acreage subject to the  
 219 special permit and may review the permitholder's business or  
 220 cultivation records at her or his place of business during  
 221 normal business hours in order to determine the acreage  
 222 cultivated. The failure of a permitholder to furnish such  
 223 statement, to make such records available, or to make and  
 224 deliver a new or additional bond or certificate of deposit is
